SPEED AND CRUISE CONTROL

*Enjoy a new relaxed driving experience
with an automatic pilot, in the city or on the highway.*

For city driving the speed control warns you when you have reached a pre-determined speed by a gentle nudge on the accelerator pedal. For highway driving, the cruise control is actuated by accelerating to a pre-determined speed and pushing the control button to the auto position, you can now remove your foot from the accelerator pedal. A slight touch of the brake pedal completely de-actuates the unit. Accelerating back to the original pre-determined speed automatically locks in the accelerator again.

Available for Chevrolet and Chevelle eight cylinder engines
