## GASOLINE HEATER AND DEFROSTER

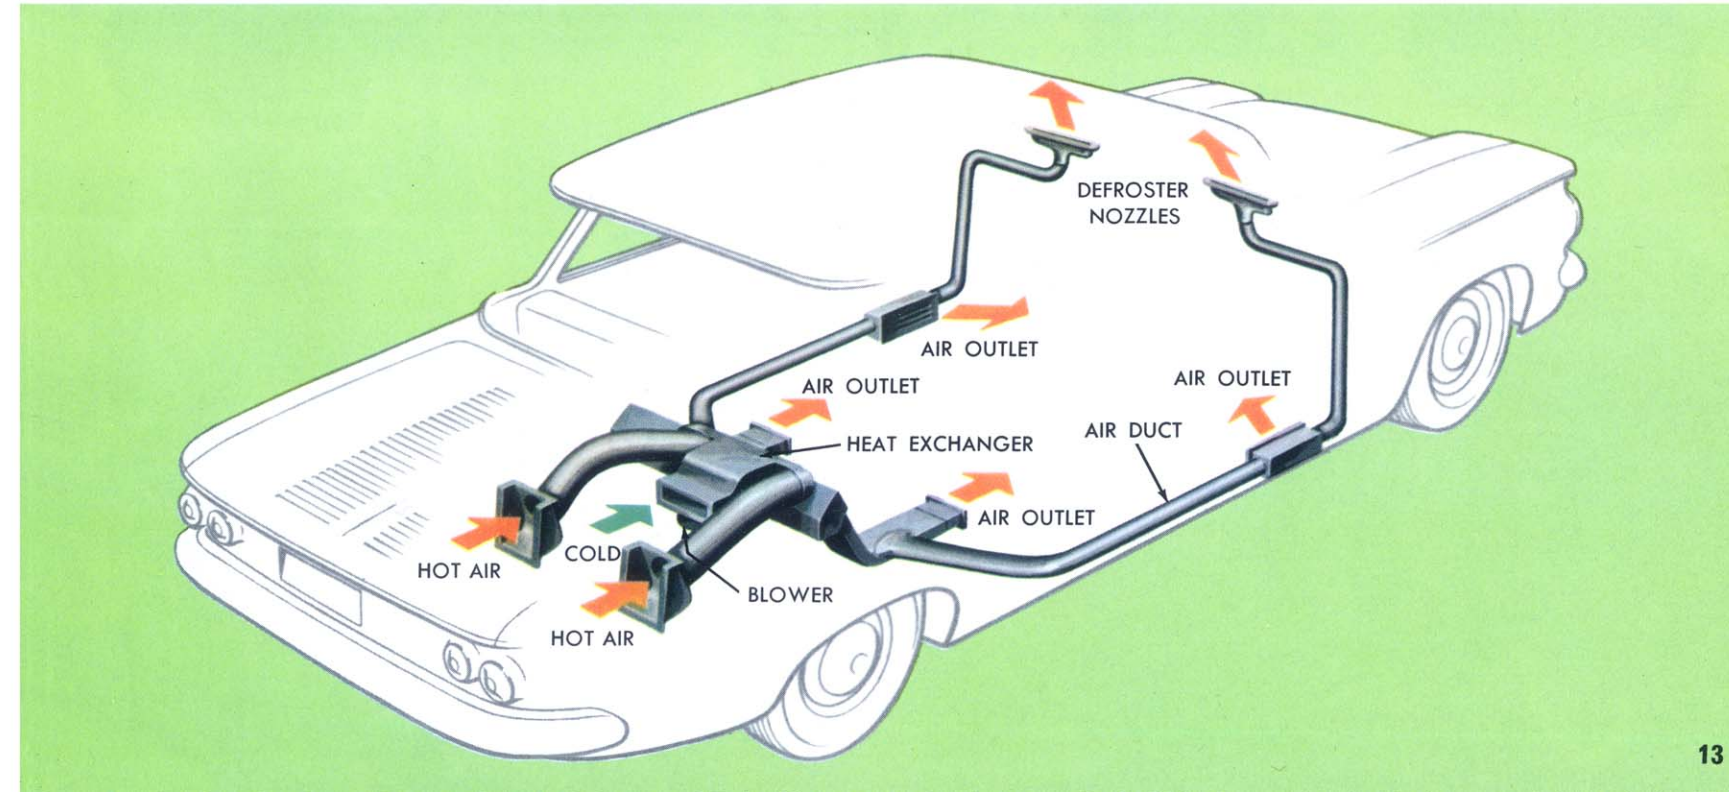

## Custom Heaters and Defrosters for Winter Comfort

### PERIMETER AIR HEATER AND DEFROSTER

The engine heat is utilized by an air heat exchanger to efficiently warm incoming outside air. The heated air is distributed through four rectangular air outlet nozzles in the passenger compartment. The heat exchanger core is filled with thin copper fins to effect a continuous heat transfer path. A three speed centrifugal blower is mounted to the heat exchanger with a temperature control system that blends the heated air and outside air.

No long waiting for the engine to warm up the heater, gives almost instant heat when the switch is turned on. The fuel for operating the heater is taken from the gasoline tank. The amount of heat desired can be controlled by the temperature control knob. A highly efficient heater and defroster.

Chart shows how heat is obtained.

## Custom Radios

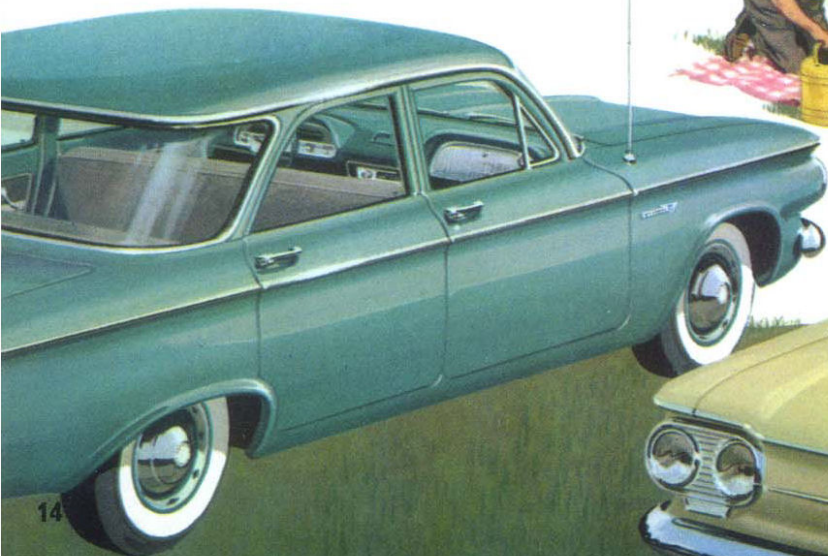

FOR CORVAIR PASSENGER CARS AND STATION WAGONS

Either radio can be installed in the passenger car or station wagon.

A modern push-button radio with the custom features that assure excellent tone quality, good station selectivity and performance that can be enjoyed at all car speeds.

A modern manual tuned radio with all the same custom features as the push-button radio to assure a good performing radio.
