

Don't let its sleek new style fool you.

Granted, this latest edition of the legendary Accord has been redesigned from the ground up to be even more stylish, comfortable and fun to drive than ever. It also offers an entirely new level of refinement that other cars will be measured against for years. And yet this is unmistakably a Honda Accord, named to Car and Driver's "10 Best Cars" roster for 16 of the past 20 years. What makes that feat even more remarkable is the fact

that the Accord is just getting warmed up.

Accord DX Sedan

- 160-hp, 2.4-liter, 16-valve i-VTEC® engine
- 5-speed manual transmission
- Available 5-speed automatic transmission
- 4-wheel double wishbone/rear five-link suspension
- Anti-lock braking system (ABS)

- · 15" wheels w/full covers
- AM/FM/CD audio system
- Power windows
- Tilt and telescopic steering column.
- Progressive self-illuminating gauges
- Dual-stage front airbags (SRS)*

Accord LX Sedan

All DX features, plus:

- Air conditioning w/air-filtration system
- Power mirrors and door locks
- Cruise control
- Remote entry system w/power window control
- · Sunglasses holder

Accord EX Sedan

Adds to or replaces LX features:

- · Front side airbags
- · 6-disc in-dash CD changer
- · Power moonroof w/tilt feature
- Available leather-trimmed interior
 w/heated front seats and dual-zone automatic climate control system

Accord LX V-6 Sedan

Adds to or replaces LX features:

- 240-hp, 3.0-liter, 24-valve VTEC[®] V-6 engine
- 5-speed automatic transmission
- Front side airbags
- Driver's seat w/8-way power adjustment
- Traction Control System (TCS)

Accord EX V-6 Sedan

Adds to or replaces LX V-6 features:

- Leather-trimmed interior w/heated front seats
- Dual-zone automatic climate control system
- Side-curtain airbags
- Available Honda Satellite-Linked Navigation System w/voice control¹

Accord's list of amenities includes power windows with a driver's auto-up/down feature. Most models also have power mirrors and door locks, too. A power moonroof is standard on all EX models. Leather-trimmed models are available with the latest Honda Satellite-Linked Navigation System. You can control many functions of this powerful new system-plus the audio and climate-control systems by simply speaking. It combines GPS technology and an 8.0-gigabyte DVD database to guide you with clear graphic and voice prompts. It can also locate over 7,000,000 points of interest, like the nearest listed ATM, gas station or restaurant so you can find just what you want. Other features include a calculator and a calendar with reminder function.

A playground for your fingertips.

On EX and EX V-6 models, you can turn music into talk radio, switch CD tracks or adjust the volume with Accord's sleekly integrated steering wheel-mounted audio controls. The cruise control on Accord LX, EX and V-6 models is operated from here as well. And this is where you'll also find the voice-control switches on navigation system-equipped Accord models.

 Only major streets, roads and highways are mapped outside metropolitan areas. See the navigation system owner's manual for the current detailed coverage areas.

Get a warm feeling. Leather-trimmed
Accord models come with 2-level heating for
the front seats. Select models also feature a
driver's seat with 8-way power adjustment.
And the front passenger's seat has standard
4-way power adjustment on the EX V-6.

Put it here. Raise the sliding armrest on the Accord's center console to find storage space that's quite versatile. There's a **coinholder** that lets you sort your change, a place for your cell phone[†] and a **12V power outlet** to plug it in. All with room to spare for odds and ends.

Optimize your environment. Select Accord EX models let you enjoy a dual-zone automatic climate control system that allows the driver and front passenger to individually adjust their comfort settings. For audio entertainment, DX models offer an AM/FM stereo CD player with two speakers. The Accord LX models surround your ears with an additional four speakers. And every EX and V-6 upgrades to a 6-disc in-dash CD changer.

† Drive responsibly. State laws prohibit distracted driving.

Big power can be fun. But a broad powerband is what you'll appreciate more. So both Accord engines employ variable valve timing and lift electronic control (VTEC) technology. VTEC uses two distinct sets of valve timing and lift specifications to optimize both low-rpm torque and high-rpm horsepower. Called i-VTEC on the new 160-hp, 16-valve, DOHC 4-cylinder, this advanced version features variable timing control (VTC) for infinitely adjustable intake-cam timing. Both engines use PGM-FI Programmed Fuel Injection and direct ignition for precise combustion. A racing-inspired drive-by-wire throttle system is on the V-6. And it's ingeniously engineered to go 105,000 miles before its first tune-up, while the 4-cylinder is set for 110,000 miles.*

For 2003, Accord's tried-and-true 3.0-liter V-6 gets a 20% boost in horsepower—to 240—while still using regular unleaded fuel. The improvement is due to a new high-inertia intake manifold, a high-flow exhaust and a higher 10:1 compression ratio.

We think you'll agree they've overachieved.

A 5-speed manual transmission comes standard on 4-cylinder models. Its sporty, short-throw shifter feels light and precise, while clutch-pedal force has been reduced. A 5-speed automatic transmission is the standard on V-6 Accords, available on 4-cylinder models. This sophisticated transmission delivers the optimum combination of enjoyable performance and excellent fuel economy² in a highly refined, smooth-shifting package.

*Does not apply to fluid and filter changes. See owner's manual for details

Of course, there's no clean-air penalty attached. The V-6 is a Low-Emission Vehicle (LEV). And select 4-cylinder Accords³ are Super-Ultra-Low-Emission Vehicles (SULEV) that just happen to be among the world's cleanest gasoline-powered cars.

Fast learners. The new Accord isn't a racecar, but it has some very close relatives that are. Honda has been racing and winning on the world's fastest racetracks for over four decades. Engineers often serve an apprenticeship on the racing teams, where they learn to innovate under pressure. This ability prepares them to achieve greater advances in performance, dependability and safety when they design new cars for the street–like the Accord.

4-wheel double wishbone/rear five-link suspension remains, it has been significantly upgraded. This system provides sharp handling response and high stability, while its new geometry refinements help reduce body-pitch angles during acceleration and braking. The precise rack-and-pinion steering system features variable power-assist.

Honda engineers applied all of their vast experience in redesigning the Accord chassis for tighter handling as well as a quieter, more refined ride. They created Subframes that provide the suspension components with solid, precise mounting while helping to isolate the passenger cabin from road noise and vibration. And they devised an engine-mount system that improves both dynamic performance and ride comfort.

Honda Factory crash test shown.

Front and rear crush zones have been designed into the new Accord's structure to help absorb crash energy and direct it around the passenger cabin. Honda engineers evaluate the strength of the safety cage with advanced computer simulations, then they test the Crashworthiness with real-world simulations.

Dual-stage front airbags are standard on every Accord, and front side airbags are available on the LX model and come standard on EX and the V-6 models. Plus, a new Side-curtain airbag system is standard equipment on the Accord EX V-6. In the event of a moderate-to-severe side impact, this system deploys on the affected side, partially covering the side windows to offer additional head protection.

The Accord's occupants are surrounded by a rigid safety cage, almost half of which is made up of high-tensile steel for great strength. It works with a system of dual-stage, dual-threshold front airbags (SRS)* designed to help prevent injury in a moderate-to-severe frontal impact. They deploy at one of two rates and thresholds depending on impact severity and seat-belt use. Every Accord also has an Immobilizer Theft-Deterrent System that prevents the car from starting unless the proper electronically coded key is used. With each use, the code changes for increased security.
