# Why Civic.

We can start by stating the things everybody knows about Honda vehicles. They're efficient, reliable, they'll run for a generation and when you're ready to part with it, you'll be amazed at the resale value. But if you're considering a coupe, all those virtues need to be balanced with the meat and muscle components of the Coupe equation. What the Civic Coupe provides beyond all that goodness is a unique driving experience. Quick, agile and responsive, one drive in the Coupe and the answer will be, "Why anything else?"

# looks cool ▶ exterior styling

3

Somebody once said it's more important to look good than to feel good. Unfortunately, some cars in this class take that literally. We don't think you have to choose between one or the other. The Civic Coupe's styling is fresh, crisp and modern. The **Special Edition** goes the extra mile with special aluminum-alloy wheels, a rear spoiler, a leather-wrapped steering wheel and **upscale** audio with an MP3-compatible 6-disc in-dash CD changer. As for the feel-good part, the Civic Coupe has lots of room for you and four friends.

Civic EX Special Edition Coupe shown in Satin Silver Metallic.

Civic LX Coupe shown in Shoreline Mist Metallic.

16-valve SOHC cylinder head

Multi-point fuel injection

Direct ignition system

110,000-mile scheduled tune-up interval\*

## count on it ▶ engine

4

Honda engine technology is nothing short of legendary. In the Civic Coupe, it combines outstanding smoothness with inspiring power and the **durability** of a sledgehammer. Value Package and LX models are rated at 115 horsepower, the lean-burn HX puts out 117, and the EX tops out at 127 horses. Featuring the additional sophistication of variable valve timing and lift electronic control (VTEC®), there's more power and **torque** at every point of the rev band in the EX model and enhanced fuel efficiency<sup>1</sup> in the HX model. All models are certified as Ultra-Low-Emission Vehicles (ULEV). To tailor the Civic to your driving style, you can have a 5-speed manual transmission, a smooth-shifting 4-speed automatic or, on the HX, an **ultra-efficient** continuously variable transmission (CVT).

\*Does not apply to fluid and filter changes. See your owner's manual for details.

Civic EX Coupe shown in Fiji Blue Pearl.

# likes curves ▶ handling

The Civic Coupe's handling can best be described as the **perfect** combination of manners and momentum. Around town, it's a well-behaved companion that treats you better than you might expect from a coupe, but no less than you deserve. On the highway, though, you can almost sense the MacPherson strut front and double wishbone rear suspension put on the driving gloves and put down its head for some

seriously fun road work. For an even bigger thrill, you can call out the reinforcements and order up the HFP Package that includes a sporty body kit, **aggressive** 16-in. alloy wheels, low-profile tires and specially tuned springs and shock absorbers. Combine all that with the variable-assist rack-and-pinion steering, stir in the rigid body structure, add a big dollop of asphalt and you're ready to enjoy a very quick feast.

4-wheel independent suspension with front toe-control arm

Low roll center for better handling

Double wishbone rear suspension

High steering ratio for quick response

Civic EX Coupe shown in Magnesium Metallic with dealer-installed accessory HFP Package.

## choices ▶ trim levels

Accolades for the Civic Coupe are impressive. Edmunds.com put the Civic Coupe on their “Most Wanted” list.<sup>2</sup> And IntelliChoice awarded the Civic Coupe their “Best Overall Value of the Year” in its segment<sup>3</sup> for 2004, based largely on the Civic’s best-in-class high resale value.

### Civic Value Package Coupe ▼

- 115-hp, 1.7-liter, 16-valve, SOHC 4-cylinder engine
- 4-wheel independent suspension
- 5-speed manual transmission
- Available 4-speed automatic
- ULEV emissions rating
- Air conditioning
- Dual-stage front airbags
- Available front side airbags
- AM/FM/CD audio system with 4 speakers
- Center console with armrest and storage compartment
- 60/40 split fold-down rear seatback

### Civic HX Coupe ▼

- 117-hp VTEC engine with lean-burn technology
- 5-speed manual transmission
- Available continuously variable transmission (CVT)
- 14-inch alloy wheels
- AM/FM/CD audio system with 4 speakers
- Power door locks and mirrors
- Cruise control
- Passenger-side walk-in feature

### Civic LX Coupe ▼

Adds to or replaces Value Package features

- 15-inch wheels
- Remote entry system
- Power windows with auto-down driver’s window
- Power door locks and mirrors
- Cruise control
- Map lights
- Passenger-side seatback pocket
- Floor mats

### Civic EX Coupe ▼

Adds to or replaces LX features

- 127-hp VTEC engine
- Anti-lock braking system (ABS)
- 15-inch alloy wheels
- AM/FM/CD audio system with 6 speakers
- Power moonroof with tilt feature
- Variable intermittent windshield wipers
- Body-colored dual power mirrors
- Rear beverage holder
- Cargo net

# room to spare ▶ interior

The Civic Coupe takes the concept of being “connected” to a level that’s **surprising** and unexpected in this class. In fact, what instant messaging technology did for computer communications, the Coupe does for communicating between the driver and the road. The front seats are deeply bolstered to help hold the driver securely in place. Naturally, they’re comfortable enough to keep you **relaxed** for a whole

day of driving. The wheel is thick and contoured for a sure grip. The gauges are large to make them a quick read. The shifter and all major controls are ergonomically placed and designed to give you what the engineers call tactile feedback. No guesswork involved. Your fingers “know” they’re working the correct functions. Add to that an **ample** cabin and you can share that road connection with four of your friends.

Room for five adults

Ergonomic design

Wide, supportive seats

Lots of storage space

Civic EX Coupe interior shown in Black.

# all the goods ▶ interior detail

Civic EX Coupe interior shown in Black with available front side airbags.

The Civic Coupe's interior leaves very little to your "want" list. Air conditioning with a filtration system is standard on Value Package, LX and EX and available on HX. Standard on all models is a 60/40 split fold-down rear seatback that makes it **easy** to carry cargo. Even long items like skis. To power take-along electronic devices like PDAs, MP3 players and cell phones,\* all models feature a 12-volt power outlet. All models also include standard front beverage holders, reclining front seatbacks, door-pocket storage bins and a remote trunk release with a lock. With so much standard, your "wants" are on our **"got it"** list.

\*Drive responsibly. State laws prohibit distracted driving.

## Well tuned.

The VP, HX and LX models feature an AM/FM/CD audio system with four speakers. The EX model comes with six speakers. The Special Edition audio system (shown) has a 6-disc in-dash CD changer that's fully MP3-compatible.

## A silver accent.

You can tell a lot by the details. Silver accents on the shift quadrant bezel and the shifter give the Civic a sporty look.

## Air unlimited.

The EX model features a standard power moonroof with a tilt feature and a sliding sunshade to reduce radiant heat on a hot day.

## Easy cruising.

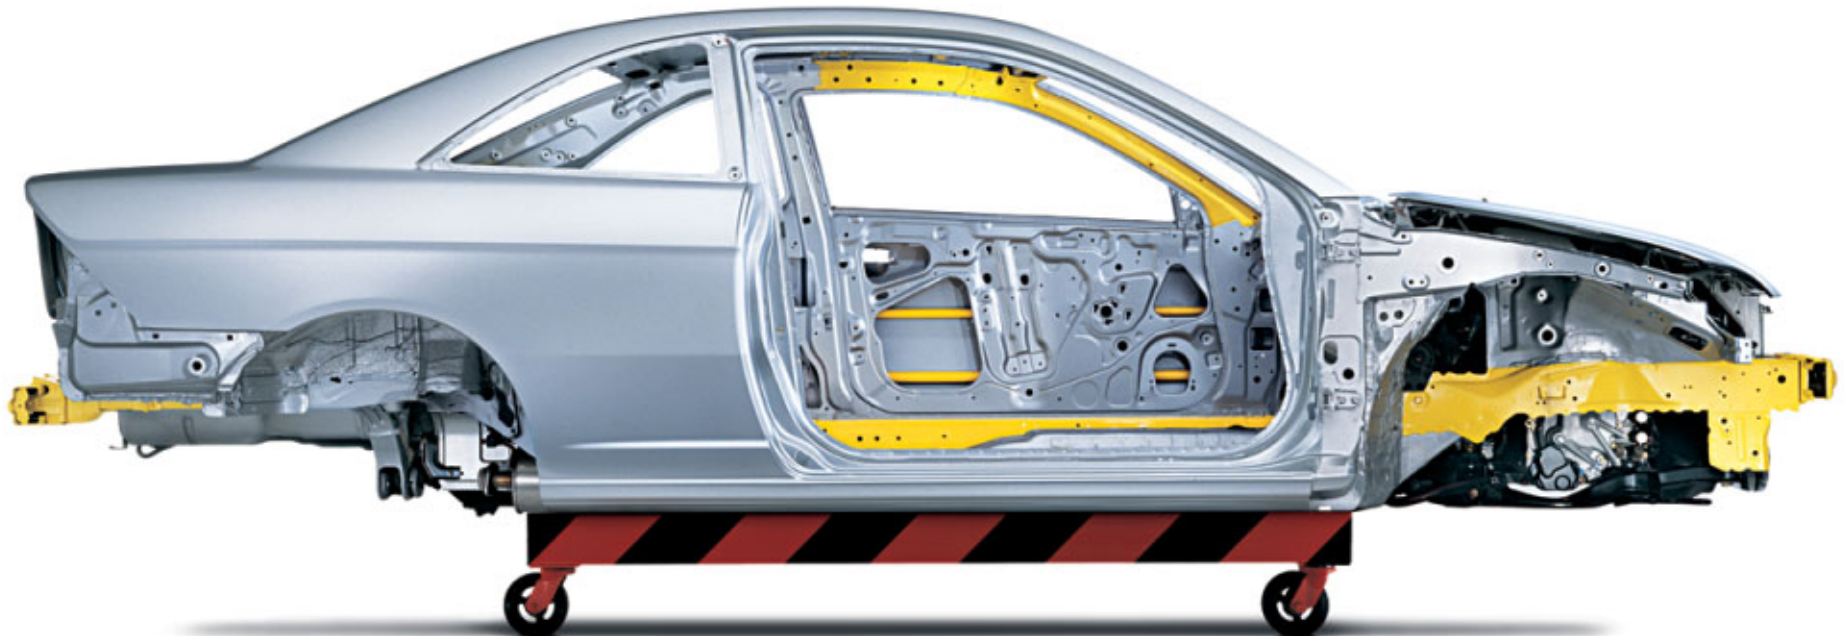

The steering wheel-mounted cruise control feature is standard on HX, LX and EX models. The Special Edition (shown) adds a leather-wrapped steering wheel.

# toughness ▶ safety for everyone

Honda's **safety for everyone** philosophy is supported by a commitment to safety that matches or exceeds our dedication to performance and quality. At its core is a substantial level of safety equipment, which includes the dual-stage, dual-threshold front airbags, available front side airbags and ABS brakes. And the proof of Honda's commitment can be found in the crash-test results provided by the National Highway Traffic Safety Administration (NHTSA). The Honda Civic Coupe has received the highest

crash-test rating—five stars—in NHTSA's frontal and side-impact tests.\* In addition to that, however, the 2004 Honda models also received more **5-star top crash-test ratings** than any other maker.<sup>†</sup> Honda doesn't wait for the government to issue guidelines. It continuously raises the bar without needing to be asked. As proof, we built the world's first indoor all-directional crash-test facility. It allows crash-testing at various speeds and angles. As independent testing shows, all this effort has paid off.

# 1 Progressive crush zones.

Front and rear crush zones deform in a controlled and progressive manner. They help absorb impact energy and dissipate it before it reaches the passenger cabin.

Crash test conducted by Honda.

# 2 Child seat anchors.

All Civic models feature the Lower Anchors and Tethers for Children (LATCH) safety system. When used with a compatible and approved child seat, the LATCH system helps ensure the correct installation of the child seat, thus enhancing child safety.

# 3 Rigid cell.

The Civic's cabin is actually a rigid cell designed to resist deformation and impact forces in a frontal or side collision. Strong pillars, rigid rocker panels and steel door beams help maintain cabin integrity.

# 4 Airbags

All models feature dual-stage front airbags (SRS)†. Front side airbags with passenger-side Occupant Position Detection System (OPDS) are also available in all models.

Front airbags inflate and deflate in a fraction of a second.

# 5 Front seat-belt pretensioners.

The 3-point seat belts at the front feature an advanced pretensioner system. Using the same impact sensors that trigger the airbags, the pretensioners activate when the impact threshold is reached. The pretensioners help to restrain the front occupants.

# 6 Anti-lock braking.

Standard in the EX model, the anti-lock braking system (ABS) allows the driver to apply maximum braking effort and still retain steering control. By pulsing the brake-line pressure many times per second, the system helps prevent wheel lockup and allows the driver to steer away from an obstacle while decelerating. This is especially useful on wet or slippery surfaces.

# 7 3-point seat belts.

All Civic Coupe models provide 3-point seat belts at every seating position to provide adequate passenger restraint in a hard braking situation or a collision.

\*National Highway Traffic Safety Administration crash tests (Civic Coupe with available front side airbags) – frontal: October 2000; side: November 2000.  
†Honda reminds you and your passengers to always buckle up.

# It's a Honda ▶ a success story

Soichiro Honda founded the Honda Motor Company in 1948 to provide people with affordable, dependable transportation. Within a few short years, Honda was one of the world's preeminent motorcycle manufacturers. At Honda, we believe that the first step in making a good product is to listen to people and understand their needs. This core value is reflected in almost everything we do, like designing and building our products in the markets where they're used. In the importance we place on safety engineering and on being friendlier to the environment. And in our belief that the power of ingenious thinking can make great things possible.

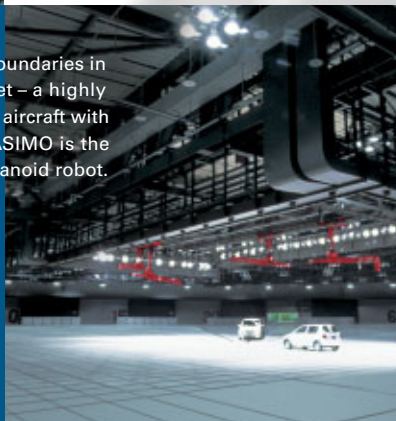

## Plenty of red, white and blue. ▶

Honda has been assembling cars in the U.S. since 1982. Today, we benefit from the efforts of almost 25,000 American associates. Close to 4 out of 5 Honda vehicles sold in the U.S. are assembled in North America. And our network of almost 600 U.S. suppliers makes more than 90% of the content that goes into those North American Honda vehicles.

## ◀ Imagination unbound.

Honda innovation is reestablishing the boundaries in aerospace technology with the HondaJet – a highly fuel-efficient, low-emission experimental aircraft with exceptional cabin space. And Honda's ASIMO is the world's most advanced and capable humanoid robot.

**“A company is most clearly defined neither by its people nor by its history, but by its products. Our products will speak the truth about Honda.”**

Soichiro Honda, Founder, ►  
Honda Motor Co., Ltd.

▼ **We have a clear edge.**

Since our pioneering CVCC engines of the '70s, Honda has led the way in Earth-friendlier cars. Today, every Honda is a Low-Emission Vehicle (LEV) or better. Our natural-gas Civic GX is the cleanest internal-combustion vehicle the EPA has ever tested.<sup>4</sup> Only Honda offers three hybrid vehicles.<sup>5</sup> And now, our advanced zero-emission FCX fuel-cell car is the first certified for commercial use in the U.S.

**Making safety for everyone.**

Honda has long been a leader in developing and applying sophisticated safety technology. Our new research facility in Ohio features the world's most advanced high-resolution crash barrier. And our Tochigi, Japan, laboratory is the world's first indoor all-directional crash-test facility. Activities at these centers are playing a critical role in the ongoing evolution of our "safety for everyone" initiative. Through a comprehensive approach to vehicle safety, Honda seeks to provide top-level occupant protection within all of our cars and trucks—regardless of size or price—as well as reduced aggressiveness toward other vehicles and improved safety for pedestrians.

◀ **Winning is good. Learning is better.**

Honda began racing motorcycles in the 1950s and cars in the '60s. Over the years, we've done quite a bit of winning, too—including the top seven places in the 2004 Indy 500,<sup>®</sup> led by Buddy Rice of Rahal-Letterman Racing. And all of our vehicles certainly reflect the advancements of our hard-won technology. But we believe the greatest benefit of racing is how it prepares our engineers to think creatively under pressure. So they're always ready for the next big challenge.

Civic EX Coupe shown in Rallye Red.
