Introducing the Commemorative Edition SL2

Some things in life are worth getting
this excited about...

...The 1999 Saturn Homecoming and the Commemorative Edition SL2 just may be two of them.

Margaret's not old enough to remember our Homecoming weekend in 1994. Back then, nearly 44,000 of our closest friends decided to spend some time together in Spring Hill to celebrate the Saturn difference.

we think something this big deserves a special car as well. That's why we've decided to make about 4,000 commemorative models like the one shown below. Each one is wrapped in a "Gold Green" metallic paint that you won't find on any other Saturn. And the interior has a lot of special features that come as standard equipment as well.

Well, we're getting set to do it all over again on July 30 and 31, 1999.

And while we're pretty certain that lots of people will take home t-shirts, jackets or other souvenirs from Spring Hill,

If you're interested in driving one of these special models home—or better yet, all the way to Homecoming—all you have to do is drop in and see your nearest retailer.

Who knows? You may end up as excited as Margaret.

Homecoming Commemorative Edition SL2
