# Fordson

THE UNIVERSAL TRACTOR

Put your farm labor costs on the right basis this year.

The low price of the Fordson, spread over a year of work, makes it the most economical workman you can employ.

This price pays for steady, continuous service, day in and day out from the time you start plowing until your crops are harvested and hauled to your market.

And orchards, cultivated with a Fordson are orchards that pay bigger returns when crop time comes.

In belt work, the Fordson supplements its work in the fields and orchards.

Operating a thresher, filling silos, used with irrigation pumps, as power for spraying equipment, it keeps your power costs down.

And it will pull trains of farm wagons from the fields to elevators, railroads or warehouses in less time and at such low cost, that its use is a source of real money saving.

A small down payment—Convenient Terms.  
Or you may take advantage of the

*Ford Weekly Purchase Plan*

The new and easier  
way to own a  
Fordson.
