

# JUNIOR SUPER CARS

Junior Super Cars, such as the W-31 package, offer several advantages:

1. Easier to insure — Insurance companies set limitations on performance-car specifications for insurability — and the Junior Super Cars meet these limitations. Also, insurance companies recognize that these cars generally cost less to repair. Consequently, insurance is cheaper and easier to get.
2. Cost less initially — The F-85 coupe with the W-31 option costs \$421.61 less than the W-30 4-4-2

## W-30

The W-30 option is designed for "off-street" use. It is specifically engineered to use exhaust manifold leaders — an option **not** permitted on the street.
