

1995

Firehawk

AN IRRESISTIBLE FORCE THAT MOVES YOU

■ In plain and simple terms, SLP's 1995 Firehawk is definitely not. Form, see for yourself, and function, 300 horsepower in base trim, 315 for the daring, have never been more perfectly matched.

■ All-new features, such as optional chromed wheels and a Hurst® six-speed shifter, aren't subtle. Then again, neither is the Firehawk. But when you lead the pack in terms of overall value and performance, that's the price you pay. Besides, anything less wouldn't move you the way Firehawk does.

1995 Enhancements

All coupes receive extensive base suspension upgrades. **Mobil1** synthetic engine oil and rear axle lubricants are featured on all Firehawks.

All-new aluminum alloy wheels accent appearance.

Hood mounted horsepower decals (300 HP or 315 HP) show the competition that all Firehawks definitely mean business.

Revised dash plaque with unit build number helps set every Firehawk apart.

Performance

0-60 mph acceleration **4.9 seconds***
1/4-mile acceleration **13.5 seconds at 103.5 mph***
Top speed **160 mph***

Powertrain

Engine Type **OHV, 350 C.I.D.**
5.7 liter V8, aluminum heads
Horsepower **300 at 5000 rpm (std.)**
315 at 5500 rpm (opt.)

342 lb-ft @ 4000 rpm (opt.)
Transmission **Six-speed manual (std.)**
Four-speed automatic (opt.)
Final Drive Ratio **3.23:1 (automatic trans.)**
3.42:1 (manual trans.)

Vehicle Specifications

Overall Length **195.6 in.**
Wheelbase **101.0 in.**
Curb Weight **3472 lbs.**

Ordering Information

Firehawk is only available as an SLP alteration on 1995 Firebird Formulas. Please specify **R6V** processing code on dealer order form. Can be ordered with almost all available Formula options. See your Pontiac dealer for details or call SLP at **1-810-288-3066**, Monday-

Friday, 8:00 a.m.-5:00 p.m. Eastern Time.

Warranty

SLP provides a three year/36,000-mile limited warranty on its components.

The standard GM warranty applies to all non-SLP vehicle components.

Available SLP Options

All-new Hurst six-speed, short-throw shifter
All-new Firehawk logo front floor mats
All-new chrome plated wheels
Performance Exhaust System (adds 15 hp)
Sport Suspension Package for the ultimate in handling

SLP ENGINEERING, INC. reserves the right to make changes to the content, specifications and pricing contained in this brochure without notice. See your Pontiac dealer or contact SLP at 1-810-288-3066 for details.

To maintain overall ride comfort, Firehawk convertible is only available with standard Formula suspension components, Firestone 245/50/16 tires, and closed lug 16" wheels with silver or optional chromed finish.

* Figures were achieved with a six-speed Firehawk coupe equipped with SLP's Performance Exhaust System under controlled conditions by a professional driver at a test track. Other models can be as much as two-tenths to five-tenths slower. Please do not race on public roads.

Effective 1-1-95, the base price for the SLP Firehawk alteration is \$6,495.00, an increase of \$500.00. Please see your Pontiac dealer for pricing information on the 1995 Firebird Formula model and specific options required for the SLP Firehawk.

1995 **Firehawk**

For 1995, Ed Hamburger and his engineers at SLP have partnered with Hurst, a legendary force in performance enhancement. The 1965 Catalina 2+2^s (shown at left) featured a Hurst shifter, now you can order a Firehawk with an all-new, optional Hurst six-speed shifter (shown at far left).

How Firehawk differs from Firebird Formula:

Twin hood scoops, special air induction system help generate Firehawk's 300 horsepower versus Formula's 275 HP. For truly serious enthusiasts, 315 HP is available.

To increase handling limits versus Formula, Firehawk coupes receive revised suspension components.

Coupes benefit from bigger, better handling Firestone[®] 275/40/17 tires and 17" wheels versus Formula's standard 16" tires/wheel combination. Firehawk convertible is only available with Firestone 16" tires and closed lug 16" alloy wheels shown directly below on vehicle.

Megaphone style, polished stainless steel tail pipe tips are standard on Firehawk.

Numbered dash plaque, exterior graphics identify every Firehawk.

SLP OPTIONS:

■ **SPORT SUSPENSION PACKAGE** includes specially calibrated shocks and progressive rate springs for more aggressive handling.

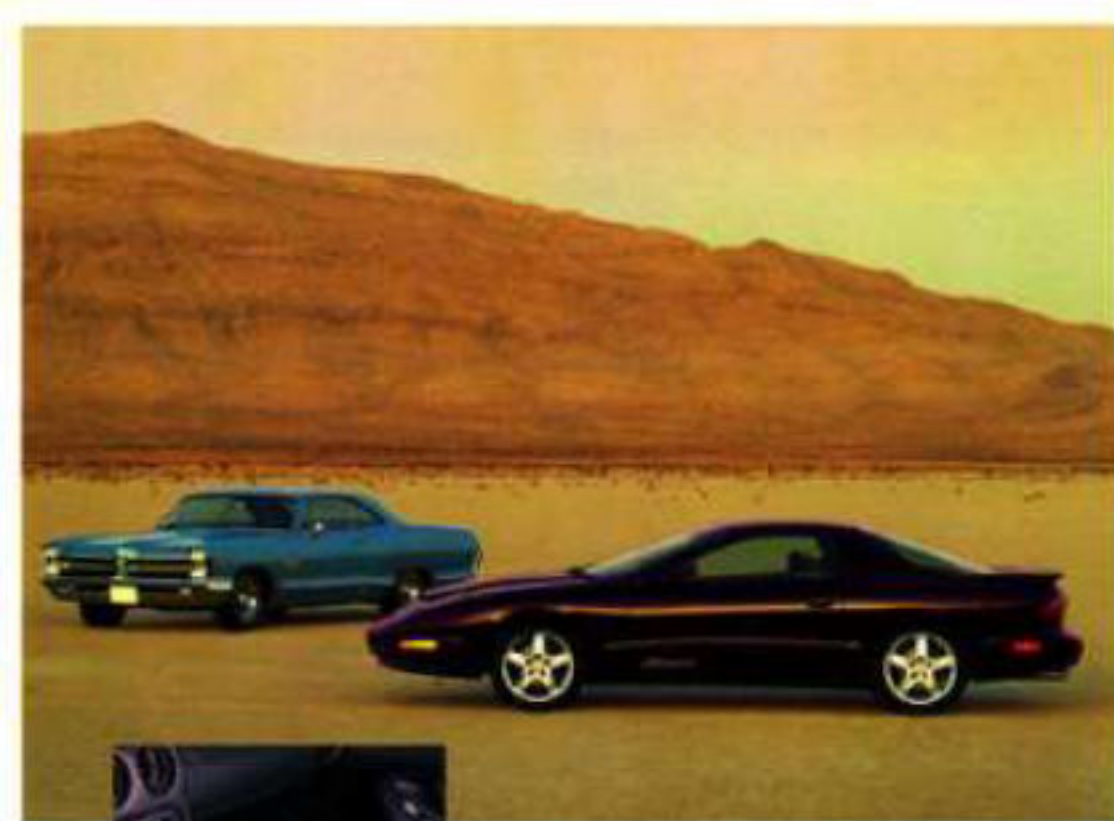

■ **PERFORMANCE EXHAUST SYSTEM** adds 15 horsepower. All stainless steel components include 3" intermediate pipe, free flowing muffler and (two) 2 1/2" tail pipes.

Hurst's six-speed, high performance shifter provides shorter, more precise shifts.

Upgrade your interior with *Firehawk* front floor mats

Opt. 17" chromed wheels available on coupe and i-top models only.

All-new-for-1995 Firehawk convertible offers open air excitement and low volume exclusivity that will move you. And the addition of **Mobil1**[®] synthetic engine oil and rear axle lubricant will enhance the long-term durability of all Firehawks.
