MAXIMIZE YOUR UPTIME

Peterbilt's SmartLINQ™ Remote Diagnostics monitors over 900 engine and emissions systems codes and provides real-time notifications via the PACCAR Solutions portal. This easy-to-use, web-based system helps you prioritize which trucks should be serviced at the next convenient opportunity or which may need immediate attention. Four levels of notification are generated – Stop Now, Service Now, Service Soon and Informational – as well as diagnostic codes from any vehicle requiring service. PACCAR Solutions allows the fleet to proactively schedule a service appointment with a Peterbilt dealer to ensure the needed resources are available when the vehicle arrives, getting your truck back on the road as quickly as possible. With SmartLINQ, Peterbilt helps you eliminate unscheduled downtime, maintain on-time freight delivery and maximize profitability.

For more information on SmartLINQ, contact your local Peterbilt dealer or visit peterbilt.com.

REMOTE DIAGNOSTICS

Diagnostic codes are instantly analyzed and communicated to the fleet manager, as well as displayed in detail on the PACCAR Solutions Web Portal. Code severity, possible solutions and the nearest Peterbilt dealership recommendations are also provided.

PACCAR SOLUTIONS SERVICE MANAGEMENT

The PACCAR Solutions Service Management portal offers real-time access to fleet health and diagnostics. The PACCAR Solutions portal provides a centralized location for scheduling and monitoring services performed at Peterbilt dealerships, including the ability to receive and approve electronic estimates for service work. The portal also includes important information such as service history, warranty and preventive maintenance schedules.

OVER-THE-AIR

To assist with your fleet uptime and scheduling, software updates can now be performed Over-The-Air (OTA). Peterbilt Class 8 trucks with a Model Year 2017 or newer PACCAR MX Engine and an active SmartLINQ Remote Diagnostics subscription can update Engine and Aftertreatment software safely and securely via the PACCAR Solutions Portal and PACCAR Over-The-Air (OTA) app. The OTA app allows customers to update the latest software – anywhere, anytime – without the need to visit the dealership, further expanding customer uptime.
