BERLINE

The new Cord Berline meets the requirements of those who desire a distinctive, fine car—adaptable for formal or informal use. This Custom-Built Cord is suitable for owner or chauffeur-driving, being equipped with glass partition between the rear and front compartments, which may be easily raised or lowered. There is choice of an interesting selection of interior treatments: All Broadcloth or Broadcloth in rear compartment and Leather in front; also with or without attractive panel which contains radio speaker, vanity, cigarette case and telephone for communication with chauffeur.

Built on a 132-inch wheelbase, the Cord Berline provides extra roominess in both front and rear compartments. Additional headroom of top-hat dimensions is also provided.

An especial delight for cross-country travellers is the spacious, easily accessible trunk and luggage compartment.

The individuality that characterizes all Cord models is carried to its ultimate conclusion in this two-purpose car—unusually smart, yet in every way socially correct. With glass partition completely down and out of sight, the car becomes a very roomy, family sedan. With glass completely up, for formal use, you have a car for chauffeur-driving, with increased privacy in the rear compartment. The Custom-Built Berline's exceptional luxury, elegance and refinement, supplement the Cord's many exclusive Front-Drive advantages—which include entirely new seating and riding comfort, safety, ease of operation and freedom from fatigue for both driver and passengers.

Other Cord models in addition to the 132" Wheelbase Berline include 5-passenger Sedan, Convertible Phaeton Sedan and Coupe, on 125" Wheelbase.

All Cord models may be had with the 125 Horse Power Engine, or with 170 Horse Power Super-Charged Engine for those who wish a superlative in performance.
