

2006 CADILLAC STS-V SUPERCHARGED. More than the rapid acceleration of air. More than pure velocity. It's about infusing an entire automobile with a supercharged spirit, from its 4.4L V8 SC, with 469 horses that rocket you from 0-60 in 4.8 seconds, to its athletic-tuned suspension to its refined driver-oriented cabin. Creating another member of the family of ultra-high-performance, limited-production automobiles — STS-V.

Cadillac STS-V shown in Light Platinum.
