A man with a beard and short dark hair is standing in a dark, industrial-looking space, possibly a warehouse or garage. He is wearing a dark leather jacket over a light-colored t-shirt and dark pants. He has a serious expression and is looking down and slightly to his left. The background is dimly lit, with some yellow light coming from a window or opening in the distance. The overall mood is gritty and industrial.

WELCOME BACK, ATTITUDE.

Welcome home: premium materials, expressive shapes and a highly customisable design make the interior of the Grandland X the ultimate you-zone.

Everything within reach: the control panels are ergonomically optimised to keep your attention on the road ahead.

Automatic emergency braking³ can independently recognise dangerous situations ahead of the road and warn the driver acoustically. If another car or a pedestrian gets too close, the system decelerates your car. It even brings it to a standstill for speeds of up to 30 km/h.

Sees ahead and maintains a safe distance from the vehicle in front at speeds between 30 and 180 km/h. The automatic acceleration and braking is extremely comfortable on long trips.

LED headlights with adaptive forward lighting².

¹ Optional with 1.6 Turbo D automatic transmission on all models. Standard on Ultimate. ² Optional on SC, SRI and Elite models. Standard on Ultimate. ³ Standard on Elite and Ultimate. Optional on SRI models as part of the Safety Pack. Automatic Emergency Braking with Pedestrian Detection works automatically above 5 km/h and below 140 km/h. From 5 to 30 km/h the deceleration metric to reduce the impact speed of the collision is 0,9 g. From 30 to 140 km/h the system reduces the speed by a maximum of 50 km/h. Above this threshold, the driver needs to brake himself/herself to reduce the speed even further. Operational speed range of Automatic Emergency Braking with Pedestrian Detection depends on the detected obstacle (mobile obstacle: from 5 to 140 km/h; fixed obstacle: from 5 to 80 km/h; pedestrian: from 5 to 60 km/h). Opel driver assistance systems are intended to support the driver within the limitations intrinsic to the system. The driver remains responsible for the driving task. Safety Pack also includes: lane keep assist, forward collision alert, automatic collision imminent braking (above 30 km/h) and driver drowsiness alert.
