HYBRID MAX REGEN IS YOUR BUILT-IN eCOACH

The standard new Hybrid Max Regen On/Off cluster message indicates increased energy efficiency while operating in low-gear range (L on shifter) as the electric battery charges during braking and certain driving dynamics — letting you know when you're optimizing the hybrid powertrain.

The available mobile app⁸ with charge status and charging station locator is customized for your Chrysler Pacifica Hybrid.

THE MOST ADVANCED ALL-WHEEL-DRIVE SYSTEM AVAILABLE IN ITS CLASS.²⁰

The available fully automatic All-Wheel-Drive (AWD) performance system helps deliver enhanced traction over a wide range of driving and road conditions, from dry pavement to snow-covered roads to non-paved surfaces, and engages seamlessly at any speed without the need of driver activation. The advanced system also automatically activates when outside temperatures near freezing, when windshield wipers are used or when road slope significantly changes.

AWD

ON-OUR-WAY READY MAKES PROMISES KEPT.

The advanced All-Wheel Drive (AWD) offered on Chrysler Pacifica detects wheel-slip and kicks in automatically to distribute power between front and rear wheels. The system is also tuned to minimize oversteer and maximize traction where snow, ice, mud, sand or gravel is present. There is no need to select AWD as the proper mode is engaged when necessary depending on road surface and driving dynamics, such as heavy acceleration and abrupt steering inputs, as well as with Electronic Stability Control²¹ activation.

KEEPS YOU MOVING ALONG

IMPRESSIVE HIGHWAY FUEL ECONOMY.

The Chrysler Pacifica gas model includes a powerful yet efficient 3.6L Pentastar® V6 engine along with the 9-speed automatic transmission — a prime factor in the driving dynamics and outstanding highway fuel economy. The sculpted design offers advanced aerodynamics, contributing to its fuel efficiency.
