

2006 SUZUKI wave

Suzuki LIVE

We're out to become the car company that makes vehicles for people who really go for it—you know, the kind of people who go water skiing before sunup, bungee jumping on their lunch hour and always make the party happen no matter where they go. So before we designed the Wave, we picked the brains of life enthusiasts, adventurers and funseekers. Talking to people like you was the only way to figure out how to build the vehicles you want—cars and SUVs that aren't just a means of getting from point A to point B, but are as integral as the hook on your fishing pole, the chain on your dirt bike or the binding on your water ski. You had some pretty good ideas. They resulted in the Suzuki Blizzard, the Sea, the Dune and the Wave, the Suzuki LIFE VEHICLE Concept Series (LIVE). Looking to get more out of life? We're giving you the green light.

Introducing Wave, one of four Suzuki LIVE Concept Vehicles

Wave's towing capacity tops 3,000 lbs. Time to buy that new boat!

The footpeds are so stylish, you won't want to wear anything but your finest flip-flops.

The rear opens up to your own barbeque/cooler deck. Let the party begin!

Plus, the barbeque and cooler are stand-alone—so you can take the festivities wherever you like.

An in-dash NAV/GPS provides all the technology you need to find your way to the latest event or stadium, or that perfect launching spot on the water.

Say "cheese." A rear-facing camera makes it easier to hook up your boat.

With built-in monitors, your passengers can watch a flick on the way to the game or the lake.
