THE MANY FACES OF PONTIAC'S SUNFIRE CONCEPT CAR

The Pontiac Sunfire is the future concept from the excitement division of General Motors. This four-person subcompact sporty coupe offers expressive styling and aggressive performance for tomorrow's image-conscious buyer.

POWERTRAIN/CHASSIS

- 2.0 liter, 16-valve DOHC turbocharged engine produces 190 horsepower.
- Five-speed Getrag manual transmission.
- Delco ABS Six anti-lock disc brakes.
- Front-wheel drive and 4-wheel independent suspension for excellent handling.
- 19-inch front wheels with P225/40R19 tires.
- 20-inch rear wheels with P255/45R20 tires.

INTERIOR

- Delco Active Radio system with compact disc player and 10 speakers.
- Voice-activated cellular telephone.
- Electric tilt steering wheel with memory.
- Analog-dialed instrument panel with electronic Head-Up display.
- 2+2 seating, featuring rear seats that are angled outward for improved leg clearance, headroom, and ease of entry and exit. Front bucket seats have six-way memory system, and fully-articulating driver's seat with air inflating lateral, lumbar and thigh supports.

EXTERIOR

- Carbon fiber body panels.
- "E Key" passive entry system automatically opens front doors, while returning driver's-side seat and mirrors to preset positions.
- Special two-part doors feature shorter, conventional front doors, and two half-size rear doors, which open from front to rear, allowing easier entry and exit.
- Composite headlights rotate up from base of windshield.
- 109-inch wheelbase and wide track stance allow tires to be pushed out to corners for increased interior space. This design also gives a more comfortable ride and provides for better cornering.
