THE ONLY WAY TO TRAVEL IS CADILLAC STYLE.™

Technology: First in the world to incorporate traction control as standard on a roadster, Cadillac incorporates proven innovations that enhance performance, comfort and safety.

Ownership: Backed by an outstanding portfolio of preferred ownership programs, a Cadillac is as comfortable to own as it is to drive.

Luxury. Distinction. Sophistication. Performance. Safety. For 1991, each has been enhanced to provide even more substance behind Cadillac Style.

Performance: The world leader in V8 power, Cadillac has created a uniquely American balance of responsiveness and refinement.

PERFORMANCE

■ New for 1991, every Cadillac Fleetwood, De Ville, Eldorado and Seville incorporates an exclusive, electronically integrated powertrain system. It combines a powerful 4.9 liter V8 with an electronically controlled four-speed automatic transmission with Cadillac-exclusive viscous converter clutch for driving responsiveness, smoothness and efficiency.

1 New 4.9 liter V8 with sequential port fuel injection is rated at 200 hp and 275 lbs.-ft. of torque, highest of any front-drive automobile in the world. Standard on Fleetwood, De Ville, Eldorado and Seville.

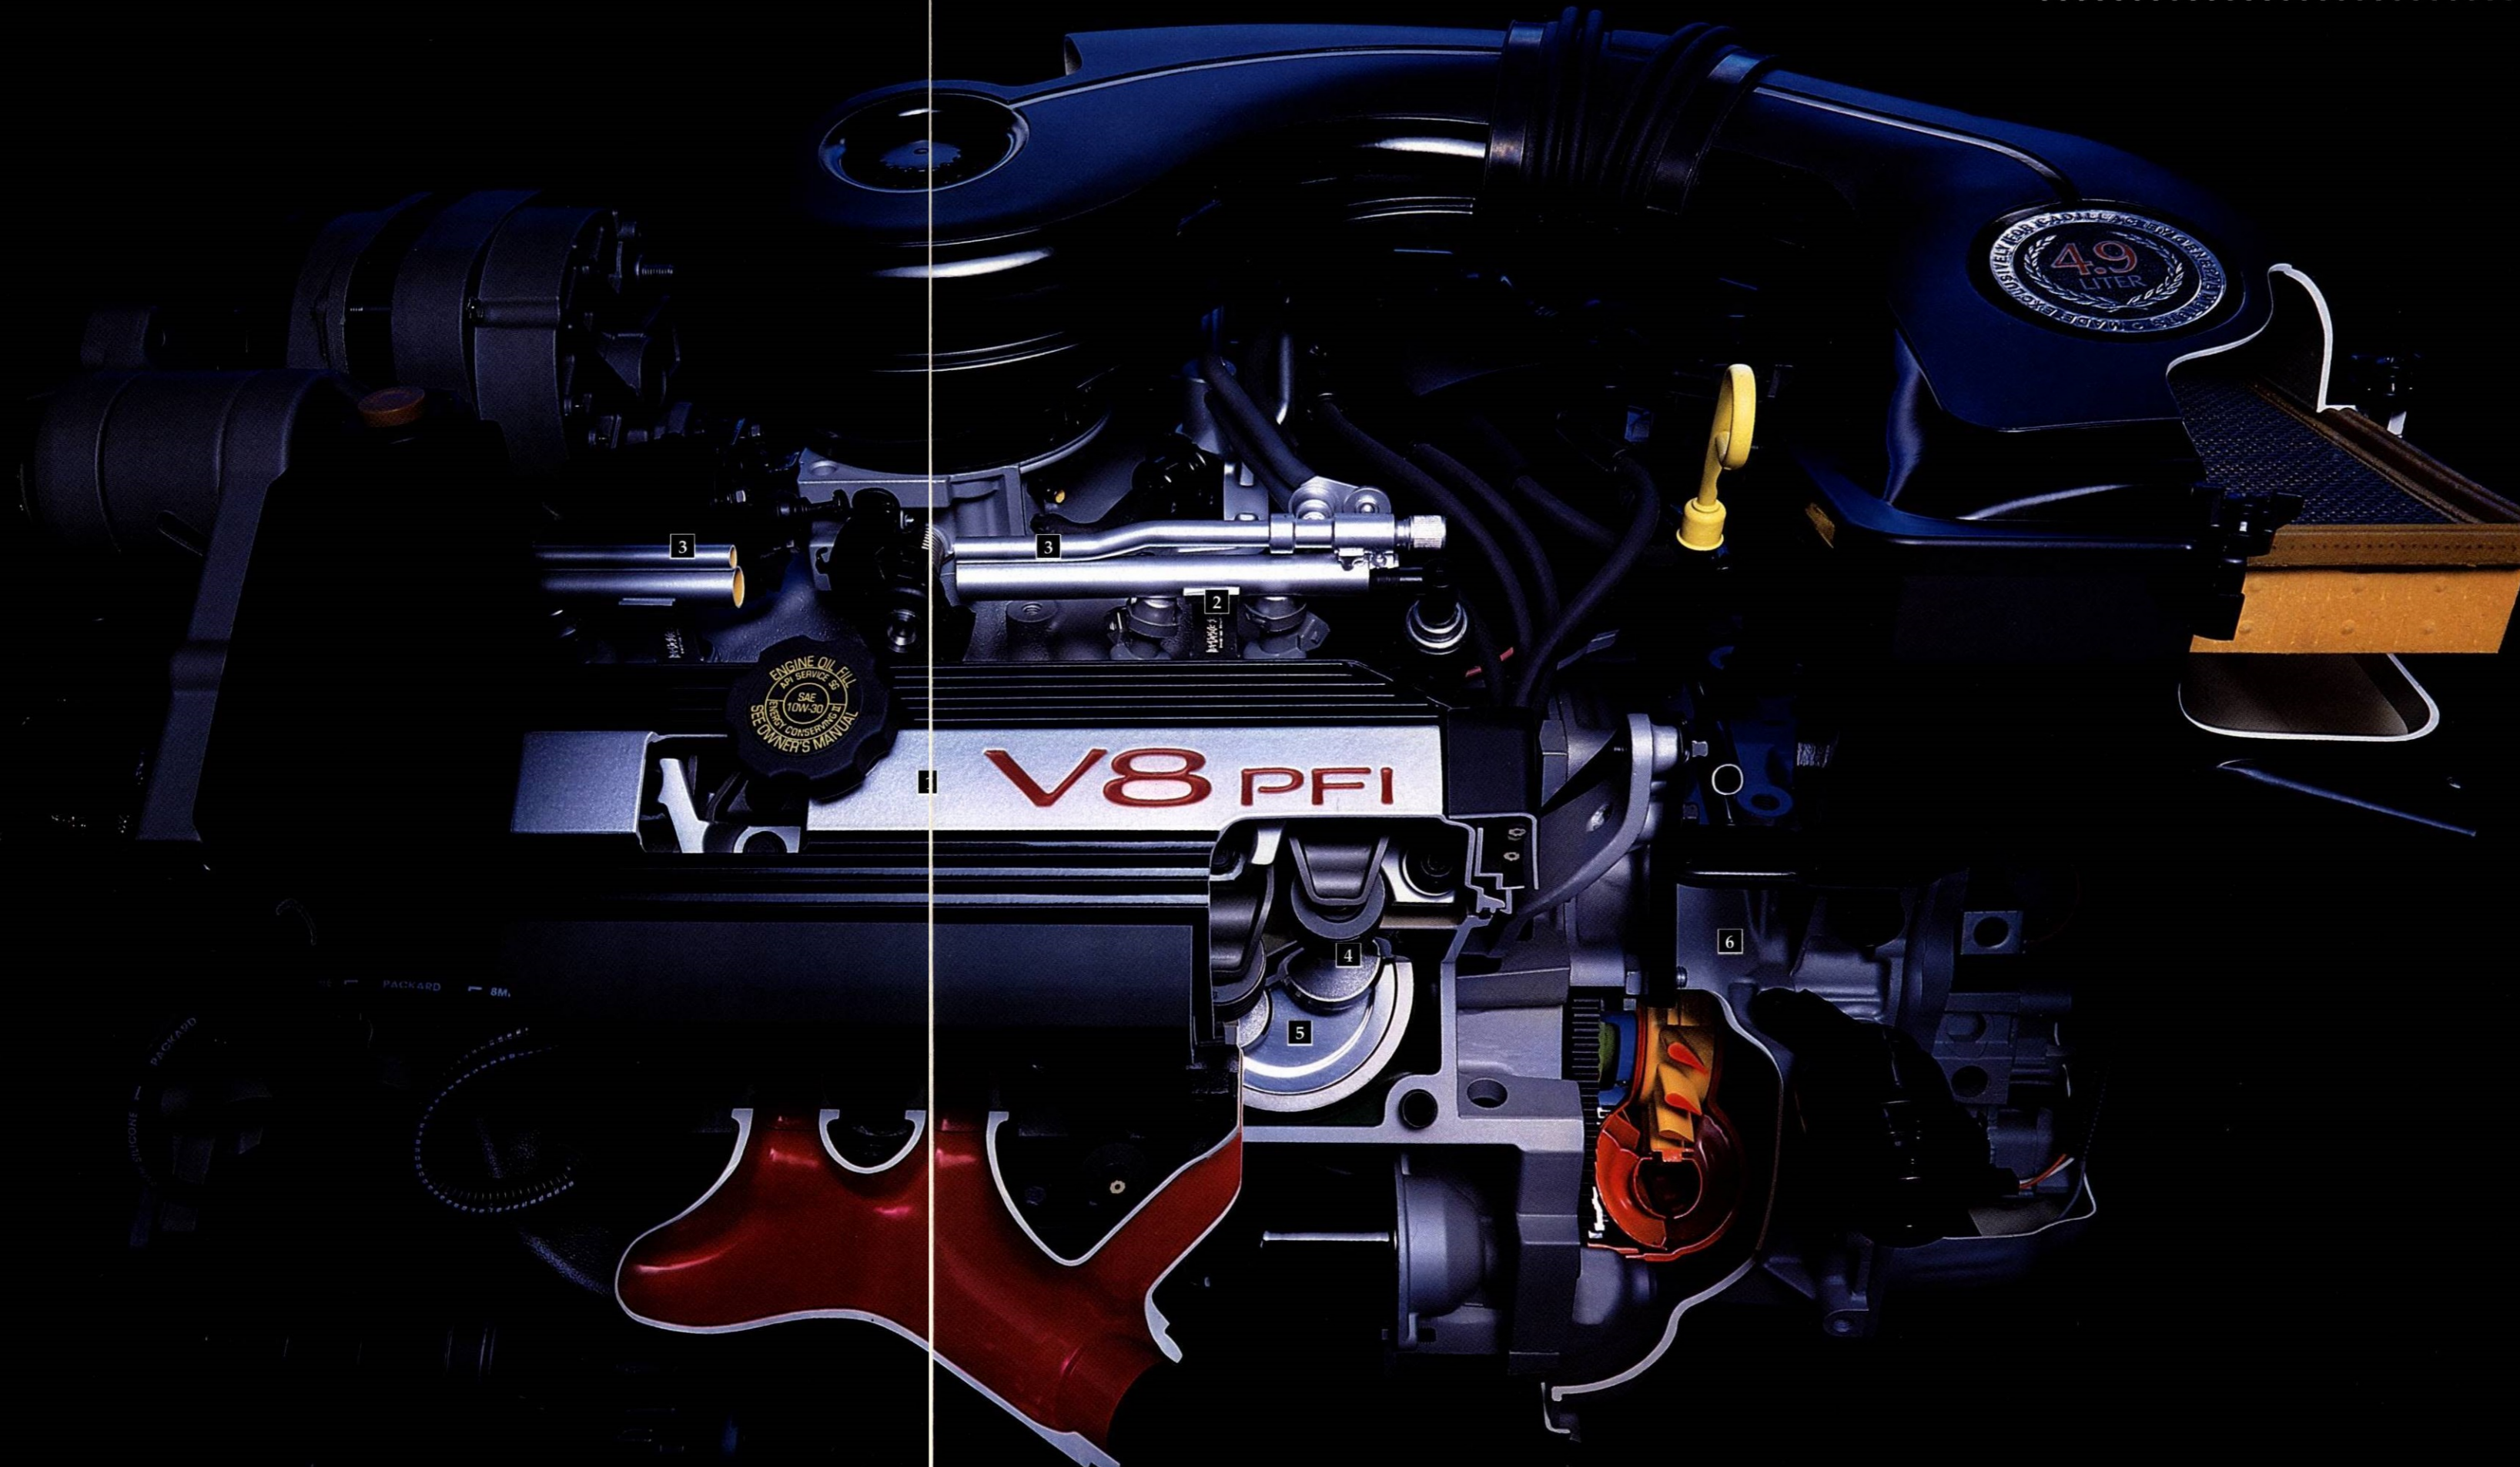

2 Sophisticated injectors deliver fuel with precise, split-second accuracy for impressive power.

3 Sequential port fuel injection provides more precise fuel metering to each individual cylinder to maximize power, especially when changing driving speed.

4 Low swirl technology in the combustion chamber and large intake valves improve engine breathing, which maximizes the output of each power stroke.

5 Longer stroke increases displacement to 4.9 liters for added torque and horsepower. Higher torque at lower engine speed improves driving response when merging.

6 Electronically controlled four-speed automatic transmission and transverse V8 engine give more precise, responsive and efficient performance. EPA estimates: 26 mpg highway.

COMFORT MODE

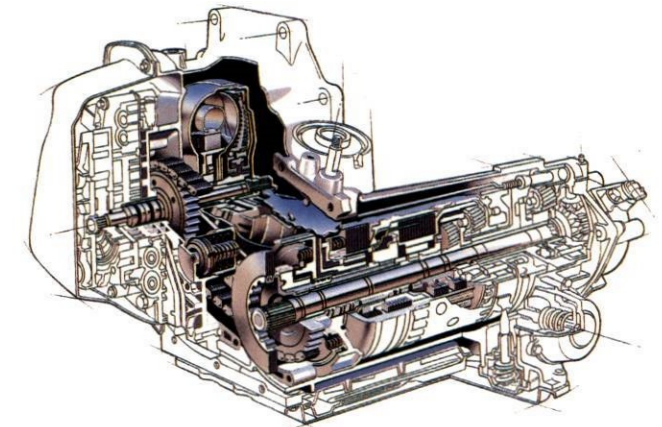

NEW COMPUTER COMMAND RIDE

TOURING MODE

Announcing a new speed-sensing suspension called Computer Command Ride (CCR). It cushions city driving, yet affords impressive control and road feel on the highway. CCR also helps keep the car level when accelerating, braking and cornering. All automatically.

CCR is standard or available on front-drive Cadillacs. Speed Dependent Damping is standard on Allanté.

Allanté is the only front-wheel-drive automobile sold in the U.S. to employ Traction Control as standard equipment. See page 21 for details.

Cadillac adds new electronic controls to the four-speed automatic transmission to deliver precise, barely detectable shifts, and smooth operation at highway speeds. Cadillac's exclusive viscous converter clutch provides excellent fuel economy while maintaining driveline smoothness.

Because the entire powertrain is controlled by one computer, it can work in harmony with the cruise control by minimizing shift busyness between third and fourth gears on long mountain upgrades.

Refer to individual car line sections for feature availability.

**Putting quality on the road,
Cadillac Style.**

Everywhere you look in a Cadillac, you see the reflection of your own high standards. Quality in Cadillacs is verified by round-the-clock durability testing, independent research analyses and the unsurpassed achievement of 42 consecutive years of luxury leadership.

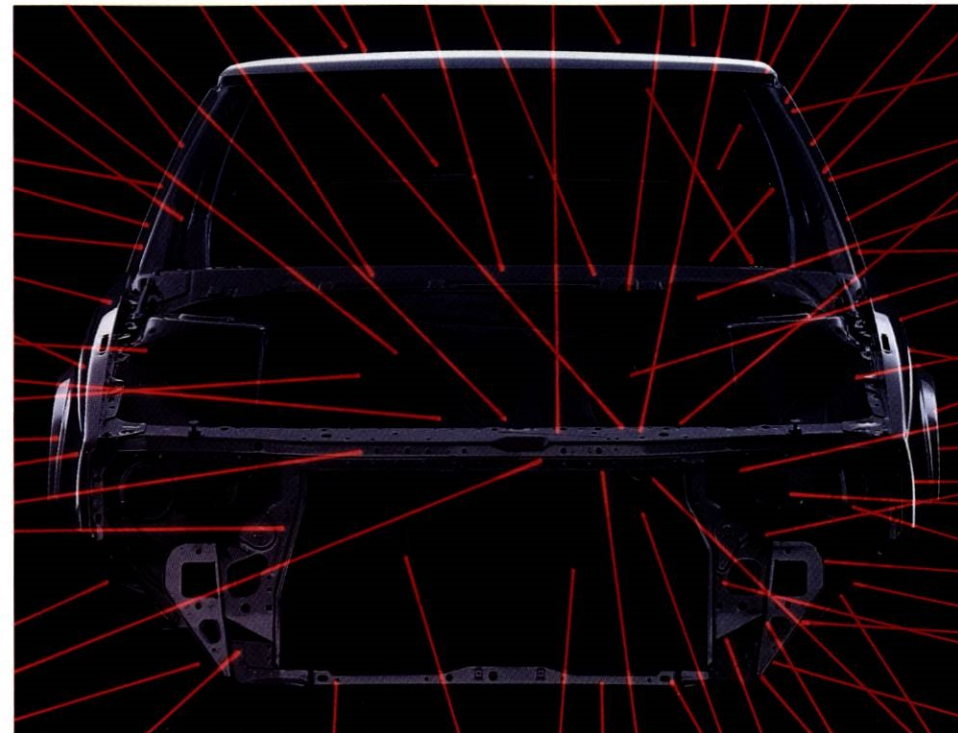

It is a confident quality backed by a 4-year/50,000-mile Gold Key Bumper to Bumper warranty that covers every part, no deductible.*

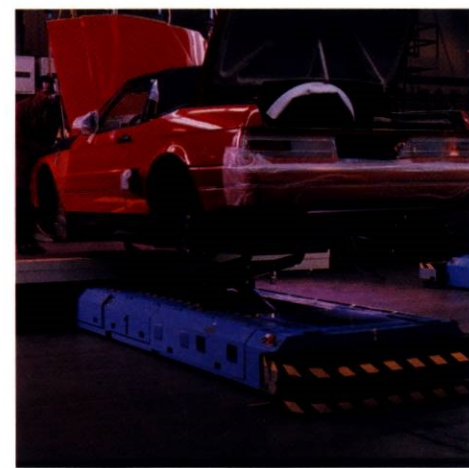

From sunbaked 120°F desert runs to windchilled -35°F winter odysseys, the V8 engines exclusively in Cadillacs have been tested in some of the toughest "real-world" conditions.

*Covers every component (except tires, which are covered by their manufacturer, adjustments, normal maintenance items and battery, which is covered by its own 4-year/50,000-mile prorated warranty).

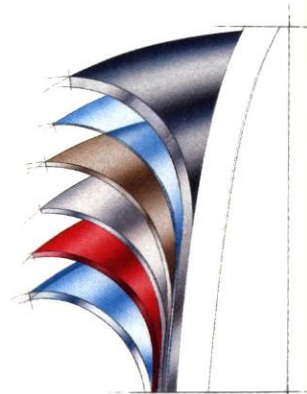

Refer to individual car line sections for feature availability.

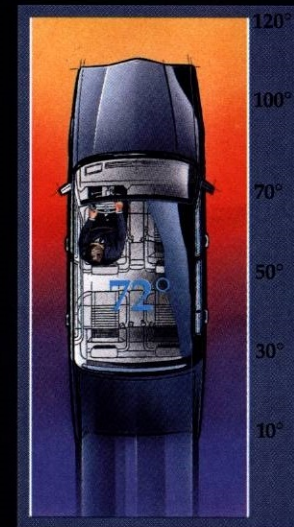

Perceptron® laser beams probe into each Cadillac at more than 600 points, verifying that fits between panels meet strict objectives.

Automatic Guided Vehicles (AGVs) move Allanté bodies from station to station along an electronic pathway. Skilled assemblers can raise or lower each AGV to an optimum work height for the assembly operation at hand.

Six coats of protectants, sealers, primers and paint cover the two-sided galvanized steel body panels used for front-drive Cadillacs. (Seven coats on Allanté.) The zinc coating actually eliminates surface rust on the outside due to scratches, dings and chips. Cadillac's corrosion coverage lasts for 6 years/100,000 miles.

A sensor measures the intensity and angle of sunlight and signals the body computer module to adjust the electronic climate control accordingly. Bringing further distinction to a system already renowned for its superior reliability.

New EZ-KOOL™ solar control glass keeps the interior cooler, enhances air-conditioning performance and lengthens cloth, leather and interior trim life.

**Orthopedically
designed.**

The innovative quality of the Fleetwood Sixty Special's 22-way seating is so unique that it is patented.

Bio-engineered with a leading research university, the split-frame seat design adjusts to accommodate your individual physique.

The result: a new standard in occupant back comfort.

An up-and-down adjustment moves front seat cushions independently from the seatbacks for maximum comfort and lower back support.

Heated front seatbacks and cushions offer extra cold-weather comfort.

Memory driver seat "remembers" two seating positions and includes an "exit" feature.

**A total commitment to V8 power
and anti-lock braking.**

Cadillac offers you the largest commitment to anti-lock braking of any automotive nameplate in the world. In fact, every 1991 Cadillac assures you the sophisticated control of anti-lock brakes standard.

In addition, Cadillac is the only American nameplate to complement the advantages of anti-lock braking with the inherent benefits of a powerful V8 standard on every automobile we sell.

Cadillac's exclusive commitment to V8 power has created the most powerful front-wheel-drive luxury cars in the world. They afford you levels of power and refinement that let you pass on two-lane roads and merge onto the highway with confidence.

Accident Avoidance Features

*Audible brake lining wear indicators,
disc brakes*

Backup lamps

*Brake system with dual master
cylinder and warning light*

Center high-mounted stop lamp

Four-way hazard warning flashers

Another
Cadillac
exclusive:
All V8.
All ABS.

An investment designed with your security in mind.

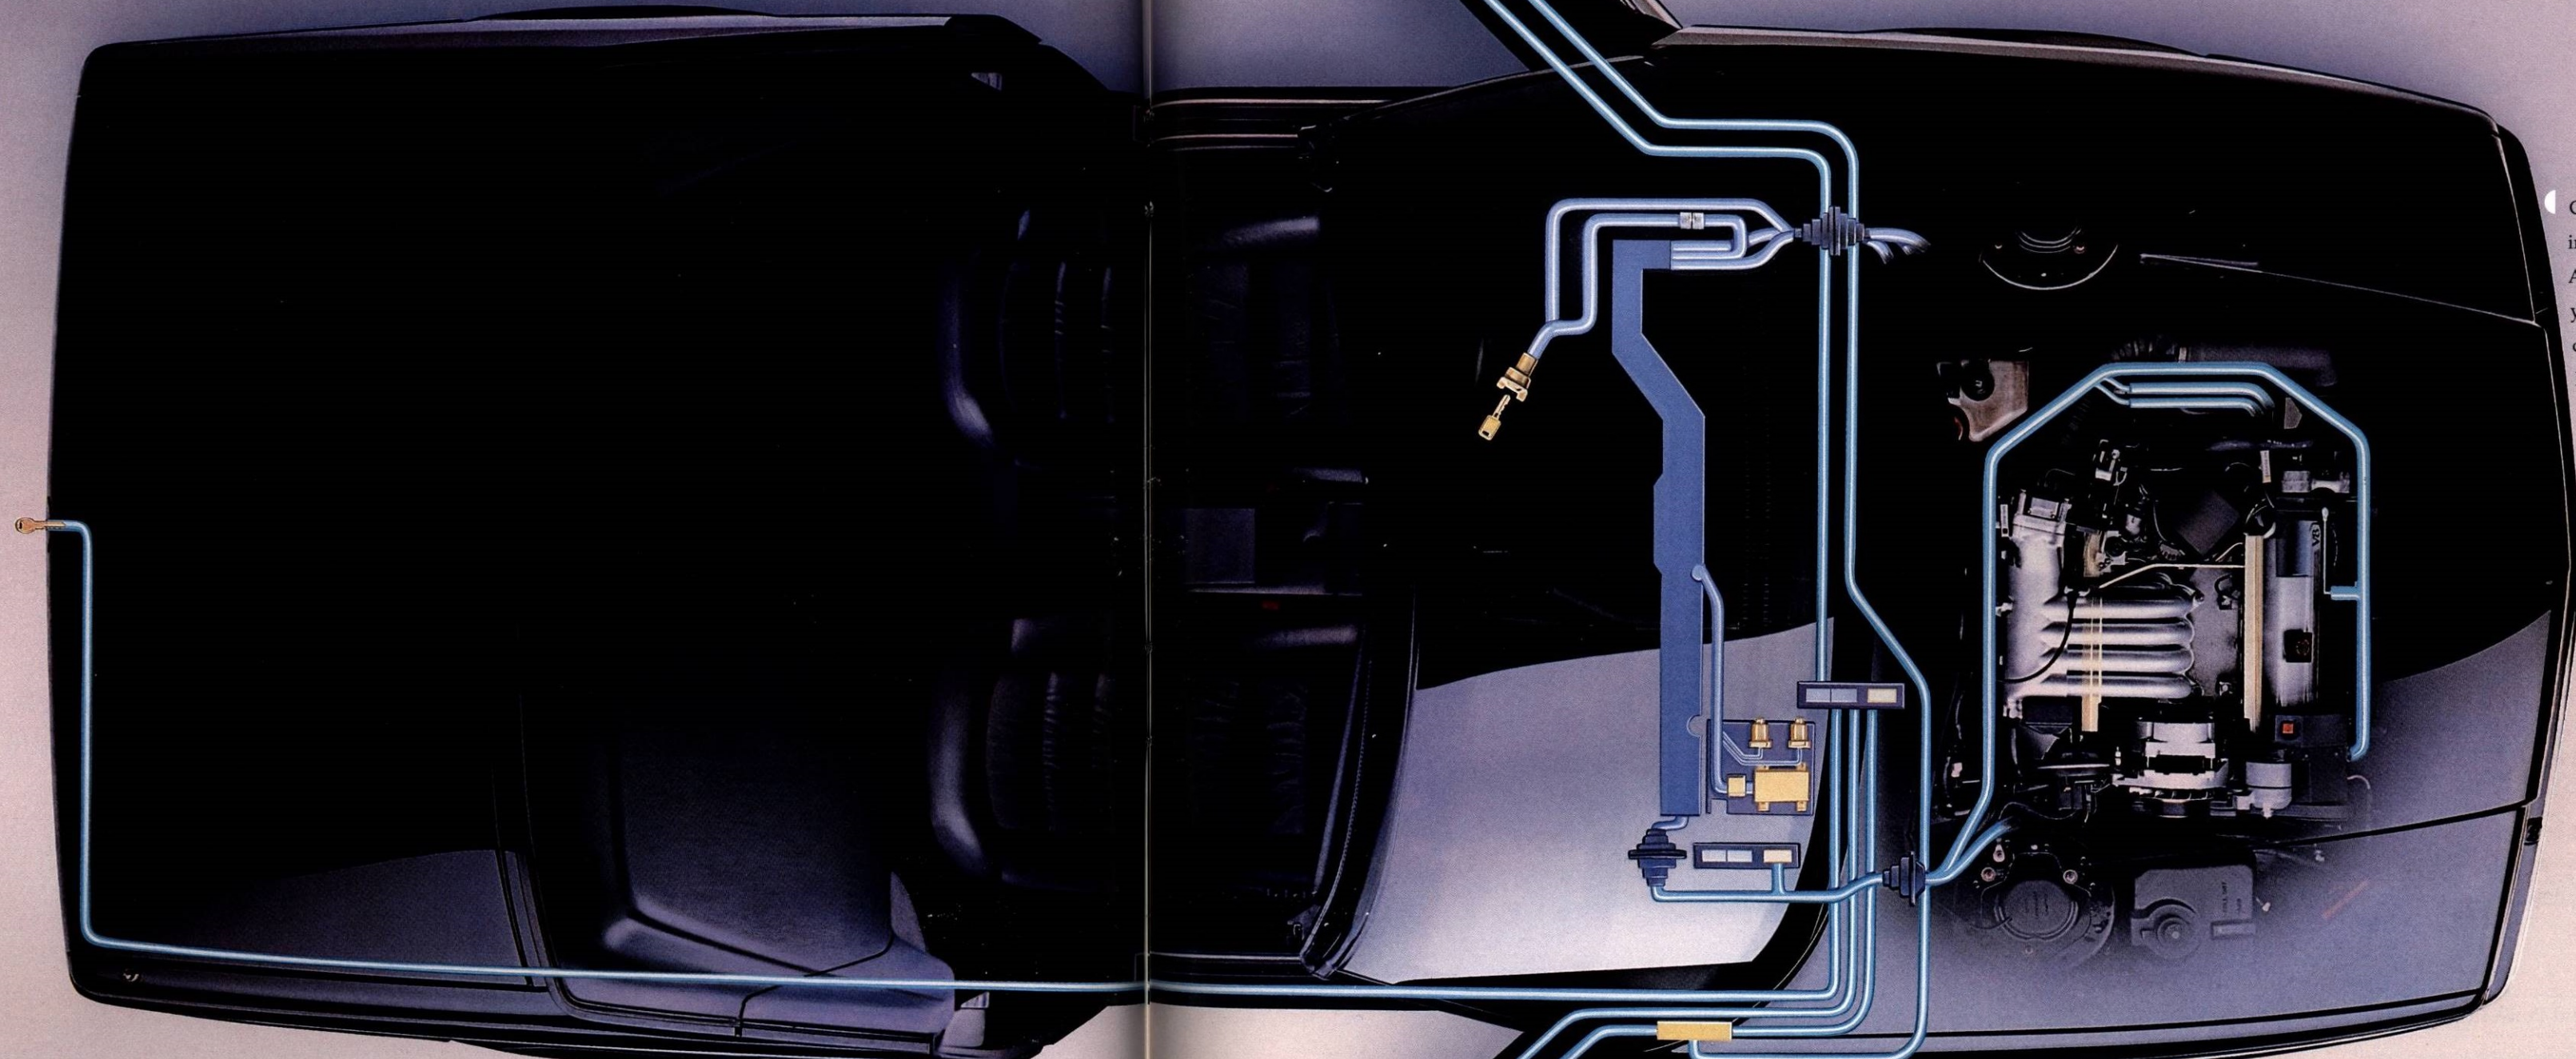

Every Cadillac affords you some of the most advanced automotive security systems in the world.

Foremost of these features is PASS Key,[®] a sophisticated automotive theft-deterrent system. Standard on all front-drive Cadillacs, PASS Key[®] employs a resistance-coded pellet discreetly placed in your ignition key. If a key that doesn't bear an identical pellet is turned in the ignition, or if ignition wiring is disturbed, the system will detect the situation. The fuel system and starter are temporarily shut down by the PASS Key[®] system to help protect your Cadillac from theft.

PASS Key[®] may also qualify you for comprehensive insurance discounts.

Occupant Protection Features

Automatic safety belt system for driver and right front passenger (Brougham) OR Supplemental Inflatable Restraint, driver only, with manual lap/shoulder safety belts for the driver and right front passenger (Allanté, Fleetwood, De Ville, Eldorado and Seville) both including visual and audible warning system.

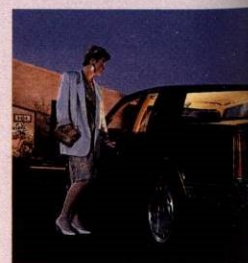

Central door unlocking on the Cadillac Allanté (left) enables you to unlock both doors by turning the key twice in any lock, even the luggage compartment lock.

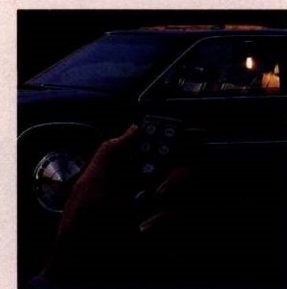

New child security rear door locks and window controls plus lap/shoulder safety belts for all front and rear window seat passengers help protect your family.

Touch the outside button of either front door and the illuminated entry system automatically lights the interior of your Cadillac for added security.

A remote keyless entry system locks and unlocks doors and unlocks deck lid from a 15-foot radius. The system also activates interior lights and the theft-deterrent system.

Twilight sentinel turns your lights on and off automatically as needed. And as you leave your Cadillac, it safely lights your way for a preset period of time. Refer to individual car line sections for feature availability.

**Building a safer automobile,
Cadillac Style.**

At Cadillac, we believe it's our duty to help protect the people who drive and ride in our cars. As a result, we conduct extensive testing and offer features which meet or exceed governmental regulations.

Every Cadillac benefits from knowledge learned at General Motors' automotive safety research center, the world's largest. There, Cadillacs undergo impact tests so exhaustive, they exceed governmental mandates. Brakes, steering and other systems are subjected to rigid trials.

The results: every Cadillac is equipped with some of the most sophisticated safety technology on the road today.

Occupant Protection Features

Manual lap safety belts, center front/rear seat positions, where applicable

Manual lap/shoulder safety belts, outboard rear seat positions

Tempered safety glass, side windows; also rear windows

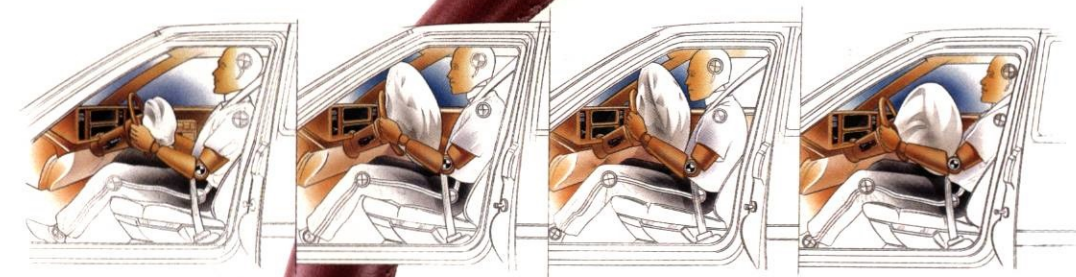

Accident Avoidance Features

Illuminated windshield wiper and washer controls (if on IP)

Low-glare finish on inside windshield moldings, wiper arms and blades, metallic steering wheel surfaces

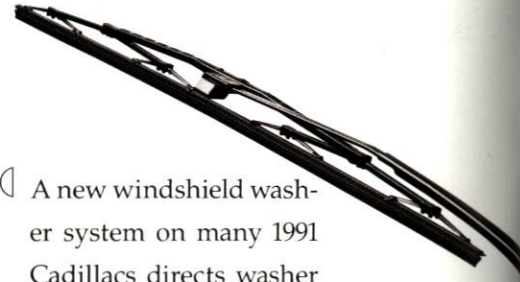

Windshield defroster, washer and multi-speed wipers

⌋ A driver-side Supplemental Inflatable Restraint system (air bag) is standard on every front-drive Cadillac. Supplementing your lap/shoulder safety belt, it inflates in 1/20 of a second, then quickly deflates.

⌋ At Cadillac, we don't just surround your family with luxury. We surround them with safety.

⌋ A new windshield washer system on many 1991 Cadillacs directs washer fluid over a wider area for improved visibility. Refer to individual car line sections for feature availability.

Cadillac proves a beautiful automobile can also be a safer automobile.

Cadillacs are renowned for their style and comfort.

But we believe that the ulti-

mate luxury in an automobile isn't a luxury at all; it's safety.

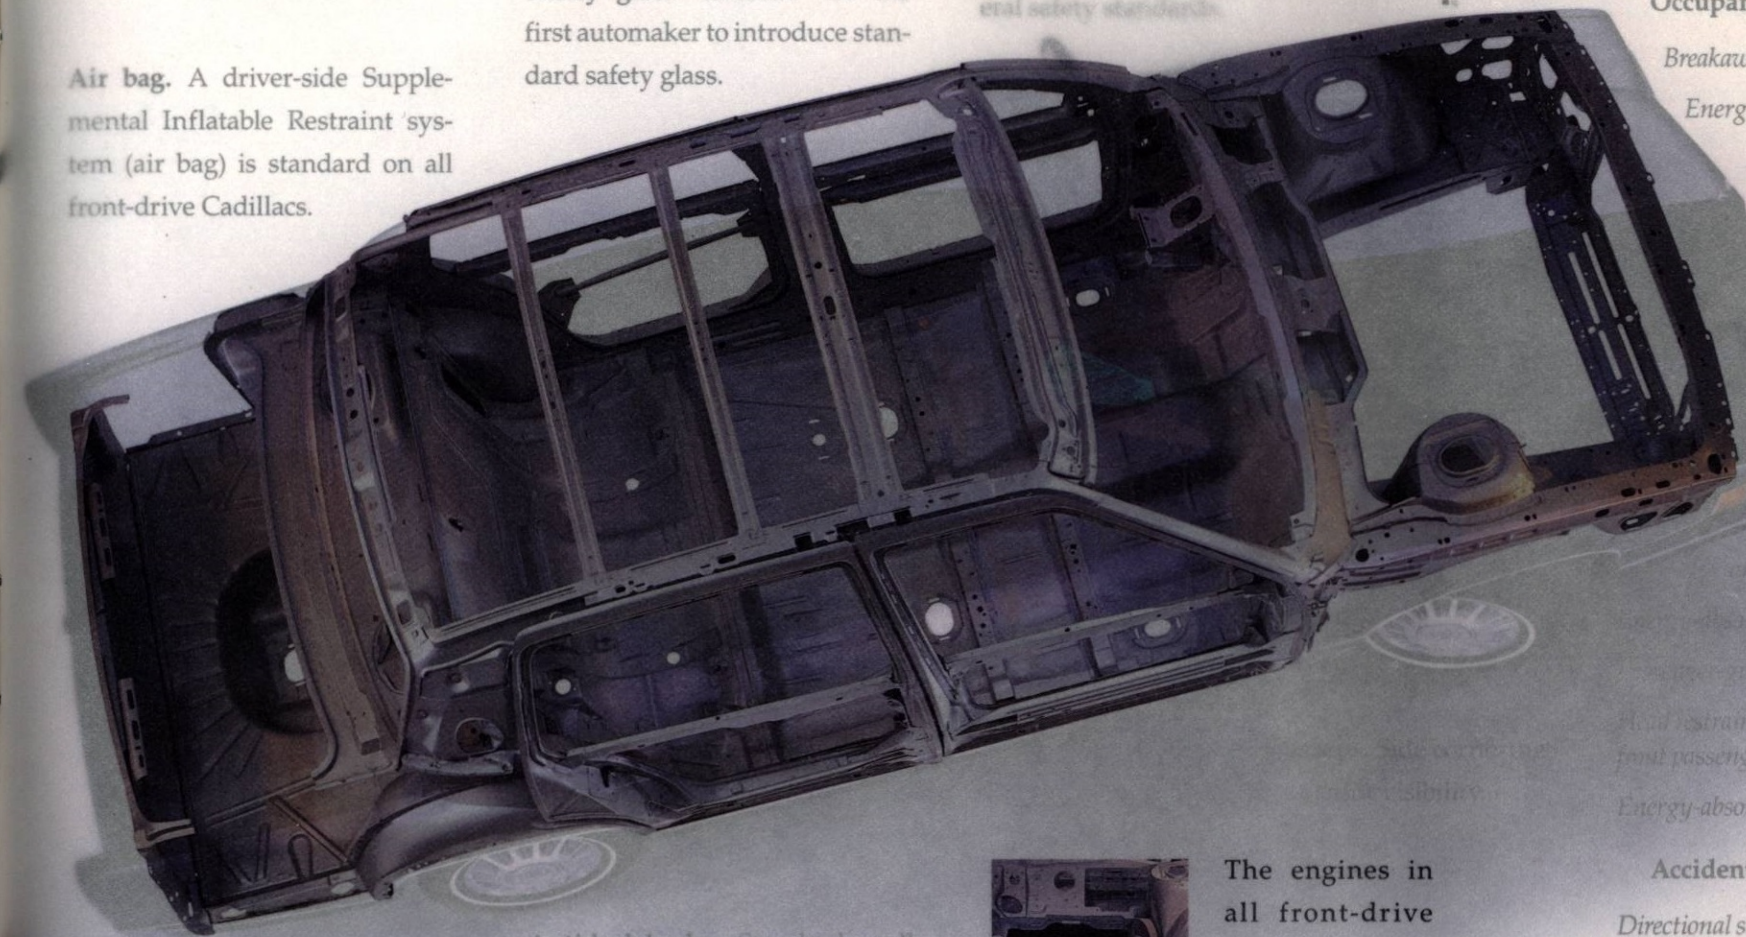

That's why every one of our Cadillacs is designed with a

rugged safety cage, made up of strong steel sections along the roof (except convertibles), door pillars and rocker panels.

Air bag. A driver-side Supplemental Inflatable Restraint system (air bag) is standard on all front-drive Cadillacs.

Safety glass. Cadillac was the first automaker to introduce standard safety glass.

Halogen headlamps. Exceed federal safety standards.

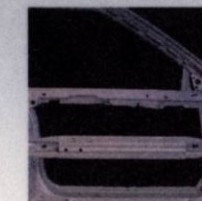

Anti-lock brakes. Standard on all Cadillacs.

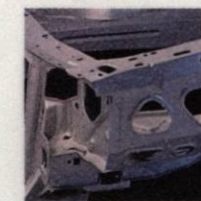

Automatic door locks. When the transmission is shifted out of park, all doors are automatically locked.

Fuel tanks on all Cadillacs are designed and tested to be protected in collisions.

Side guard door beams help reduce intrusion in the event of a side impact.

Energy-absorbing "crush zones" in the front and rear help absorb energy in the event of a collision.

All front-drive Cadillacs feature body-frame integral construction. All sections of the car are securely welded.

Occupant Protection Features

- Breakaway inside rearview mirror*
- Energy-absorbing steering column*
- Inertia-locking, folding front seatbacks, two-door models*
- Interlocking door latches*
- Pressure lock radiator cap*
- Dual sun visors*
- Safety armrests*
- Side-guard door beam*
- Security door lock and door retention components*
- Energy-absorbing seatback tops, front and rear*
- Energy-absorbing inside door lock handles*
- Head restraints, driver and right front passenger (adjustable)*
- Energy-absorbing instrument panel*

Accident Avoidance Features

- Directional signal control with lane-change feature*
- Dual-action hood latch*
- Illuminated heater and defroster controls*
- Inside rearview mirror*
- Outside left and right rearview mirrors*
- Parking lamps that illuminate with headlamps*
- Pressure-relief fuel cap (pressure-relief fuel system on Allanté)*
- Safety road wheel rims*
- Side marker lamps and reflectors*
- Starter safety switch*
- Tires with built-in tread wear indicators*

The engines in all front-drive Cadillacs are designed to rotate downward in a frontal collision.

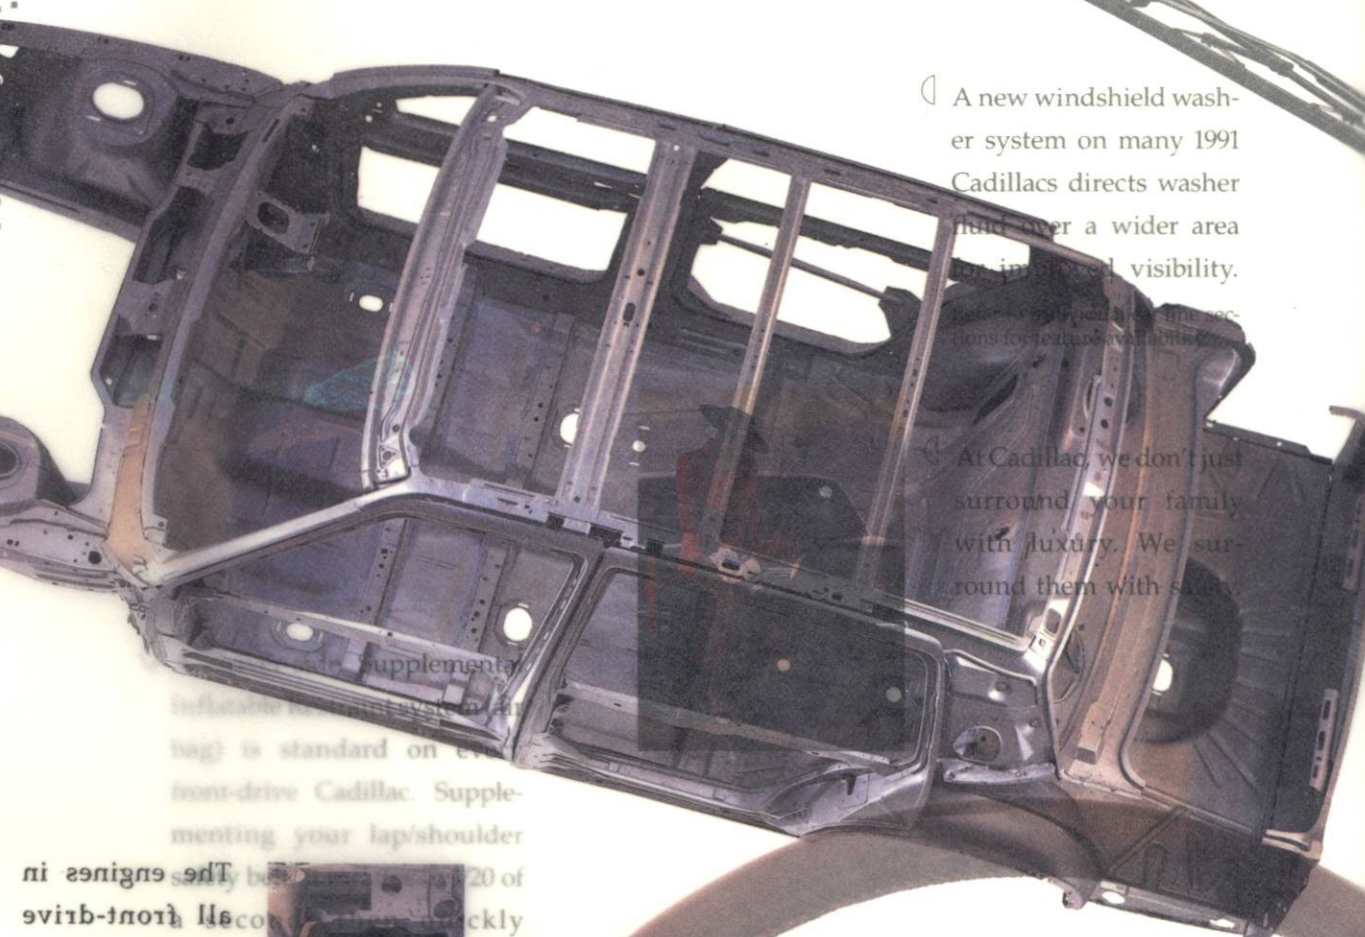

All front-drive Cadillacs feature body-frame integral construction. All sections of the car are securely welded.

Fuel tanks on all Cadillacs are designed and tested to be protected in collisions.

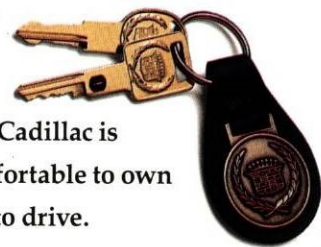

Side guard door beams help reduce intrusion in the event of a side impact.

**No-deductible,
bumper-to-bumper warranties.**

The substance of Cadillac Style includes warranty protection among the finest of any luxury car—foreign or domestic.

Cadillac's Gold Key Bumper to Bumper warranty covers every component of every Cadillac—no exceptions, no deductibles—for 4 years/50,000 miles.* The Allanté Assurance Plan extends powertrain and major assembly component protection to 7 years/100,000 miles.**

**Why a Cadillac is
as comfortable to own
as it is to drive.**

An outstanding portfolio of services is another reason why Cadillac owners are the most loyal of all luxury car owners.†

As a Cadillac owner, you have the support of over 1,600 leading luxury Cadillac dealers nationwide. As part of Cadillac's Gold Key delivery system, your sales representative will make sure the fuel tank is filled and introduce you to key dealership personnel.

*Covers every component (except tires, which are covered by their manufacturer, adjustments, normal maintenance items and battery, which is covered by its own 4-year/50,000-mile prorated warranty).

**Unique Allanté Assurance Plan. See your dealer for terms of this limited warranty.

†According to an R. L. Polk & Co. study of initial retail purchasers of leading 1989 luxury cars.

**Cadillac Roadside Service®
follows you wherever you go.**

Cadillac Roadside Service® has more participating dealers offering on-the-spot service than any other luxury car program. As a Cadillac owner, you are automatically covered—whatever year or model you drive.

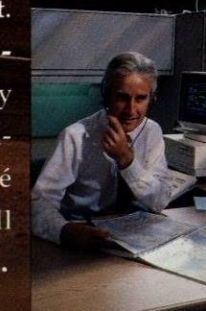

Call toll-free **1-800-882-1112** to talk with factory-trained service advisors 24 hours a day, 365 days a year. They will help remedy your situation right over the phone.

If necessary, a highly trained service technician will be dispatched in a special vehicle that carries genuine GM parts to provide on-the-spot service when you need it the most—nights, weekends and holidays.

We listen 24 hours a day.

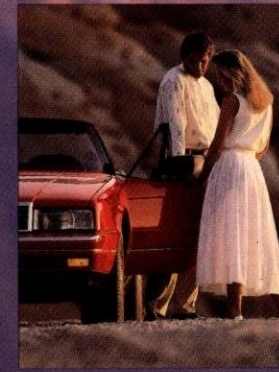

Cadillac's Consumer Relations Center is a 24-hour owner hotline to get you in contact with a Cadillac specialist.

Call **1-800-458-8006** with any inquiries or concerns. Allanté owners may call **1-800-ALLANTÉ.**

1 | 9 | 9 | 1

Allanté, the ultra-luxury roadster with coachwork designed and handcrafted in Italy by Pininfarina. Allanté combines a high-output V8, European road manners, advanced technology and renowned Cadillac comfort to afford you the finest in open-air motoring.

Allanté® shown in Red. Allanté interior with Charcoal leather seating areas shown on the following pages.

Allanté's soft top affords you the inherent advantages of a heated glass rear window.

Controls for Recaro® seats include 10-way power adjustment and two-position driver-side memory.

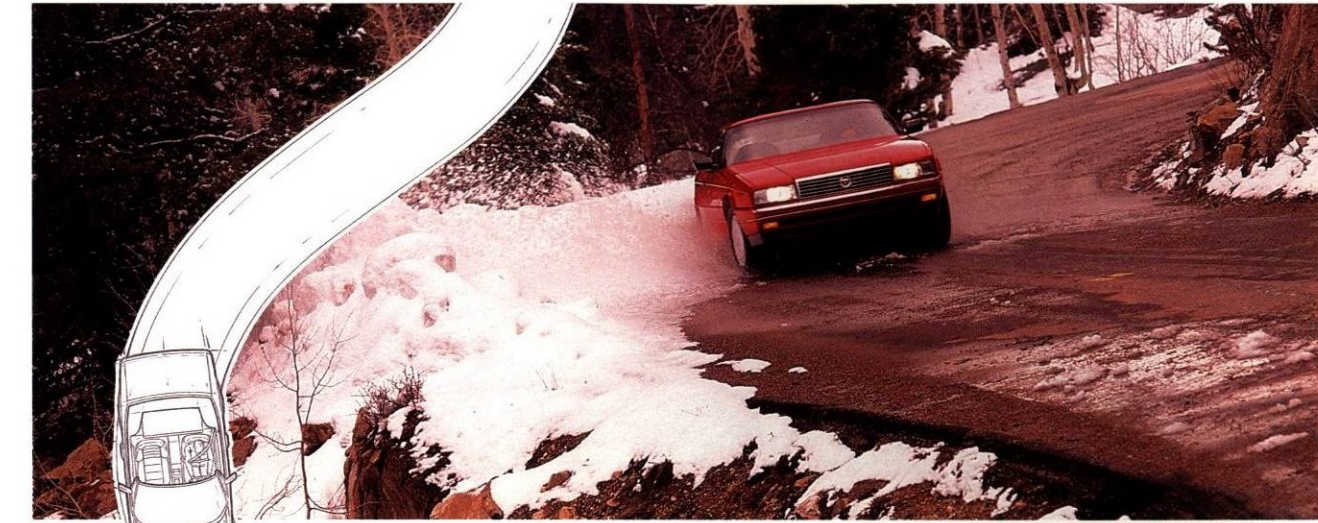

Allanté's new, 200-watt Delco/Bose 200 Series sound system is custom-equalized to complement Allanté's interior surfaces and dimensions.

The first roadster in the world with Traction Control standard. Allanté combines the advantages of standard Traction Control, anti-lock braking and variable assist steering. Allanté also balances inspired performance with Cadillac refinement by virtue of its responsive 200-horsepower, tuned V8. High performance four-speed automatic transmission with overdrive. And an enhanced Speed Dependent Damping suspension and Cadillac-exclusive Goodyear Eagle 16" V-rated tires.

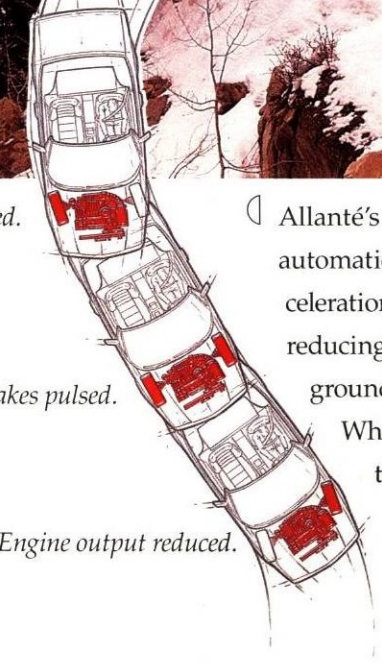

New platinum-tipped spark plugs are so durable, their recommended replacement interval is an impressive 100,000 miles.

Wheel slip detected.

Anti-lock brakes pulsed.

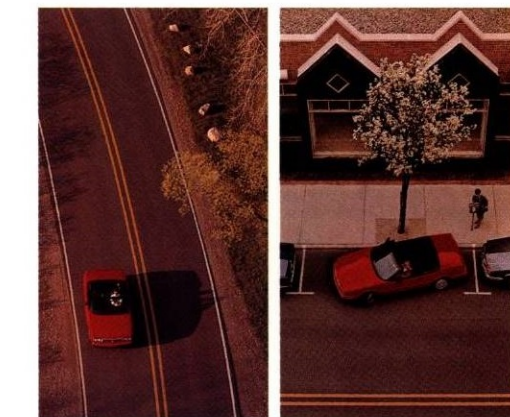

Engine output reduced.

Allanté's standard Traction Control system automatically detects wheel slip during acceleration, pulsing the anti-lock brakes and reducing engine output until wheel and ground speed are nearly matched. Wheel slip is minimized for greater control on virtually any road surface.

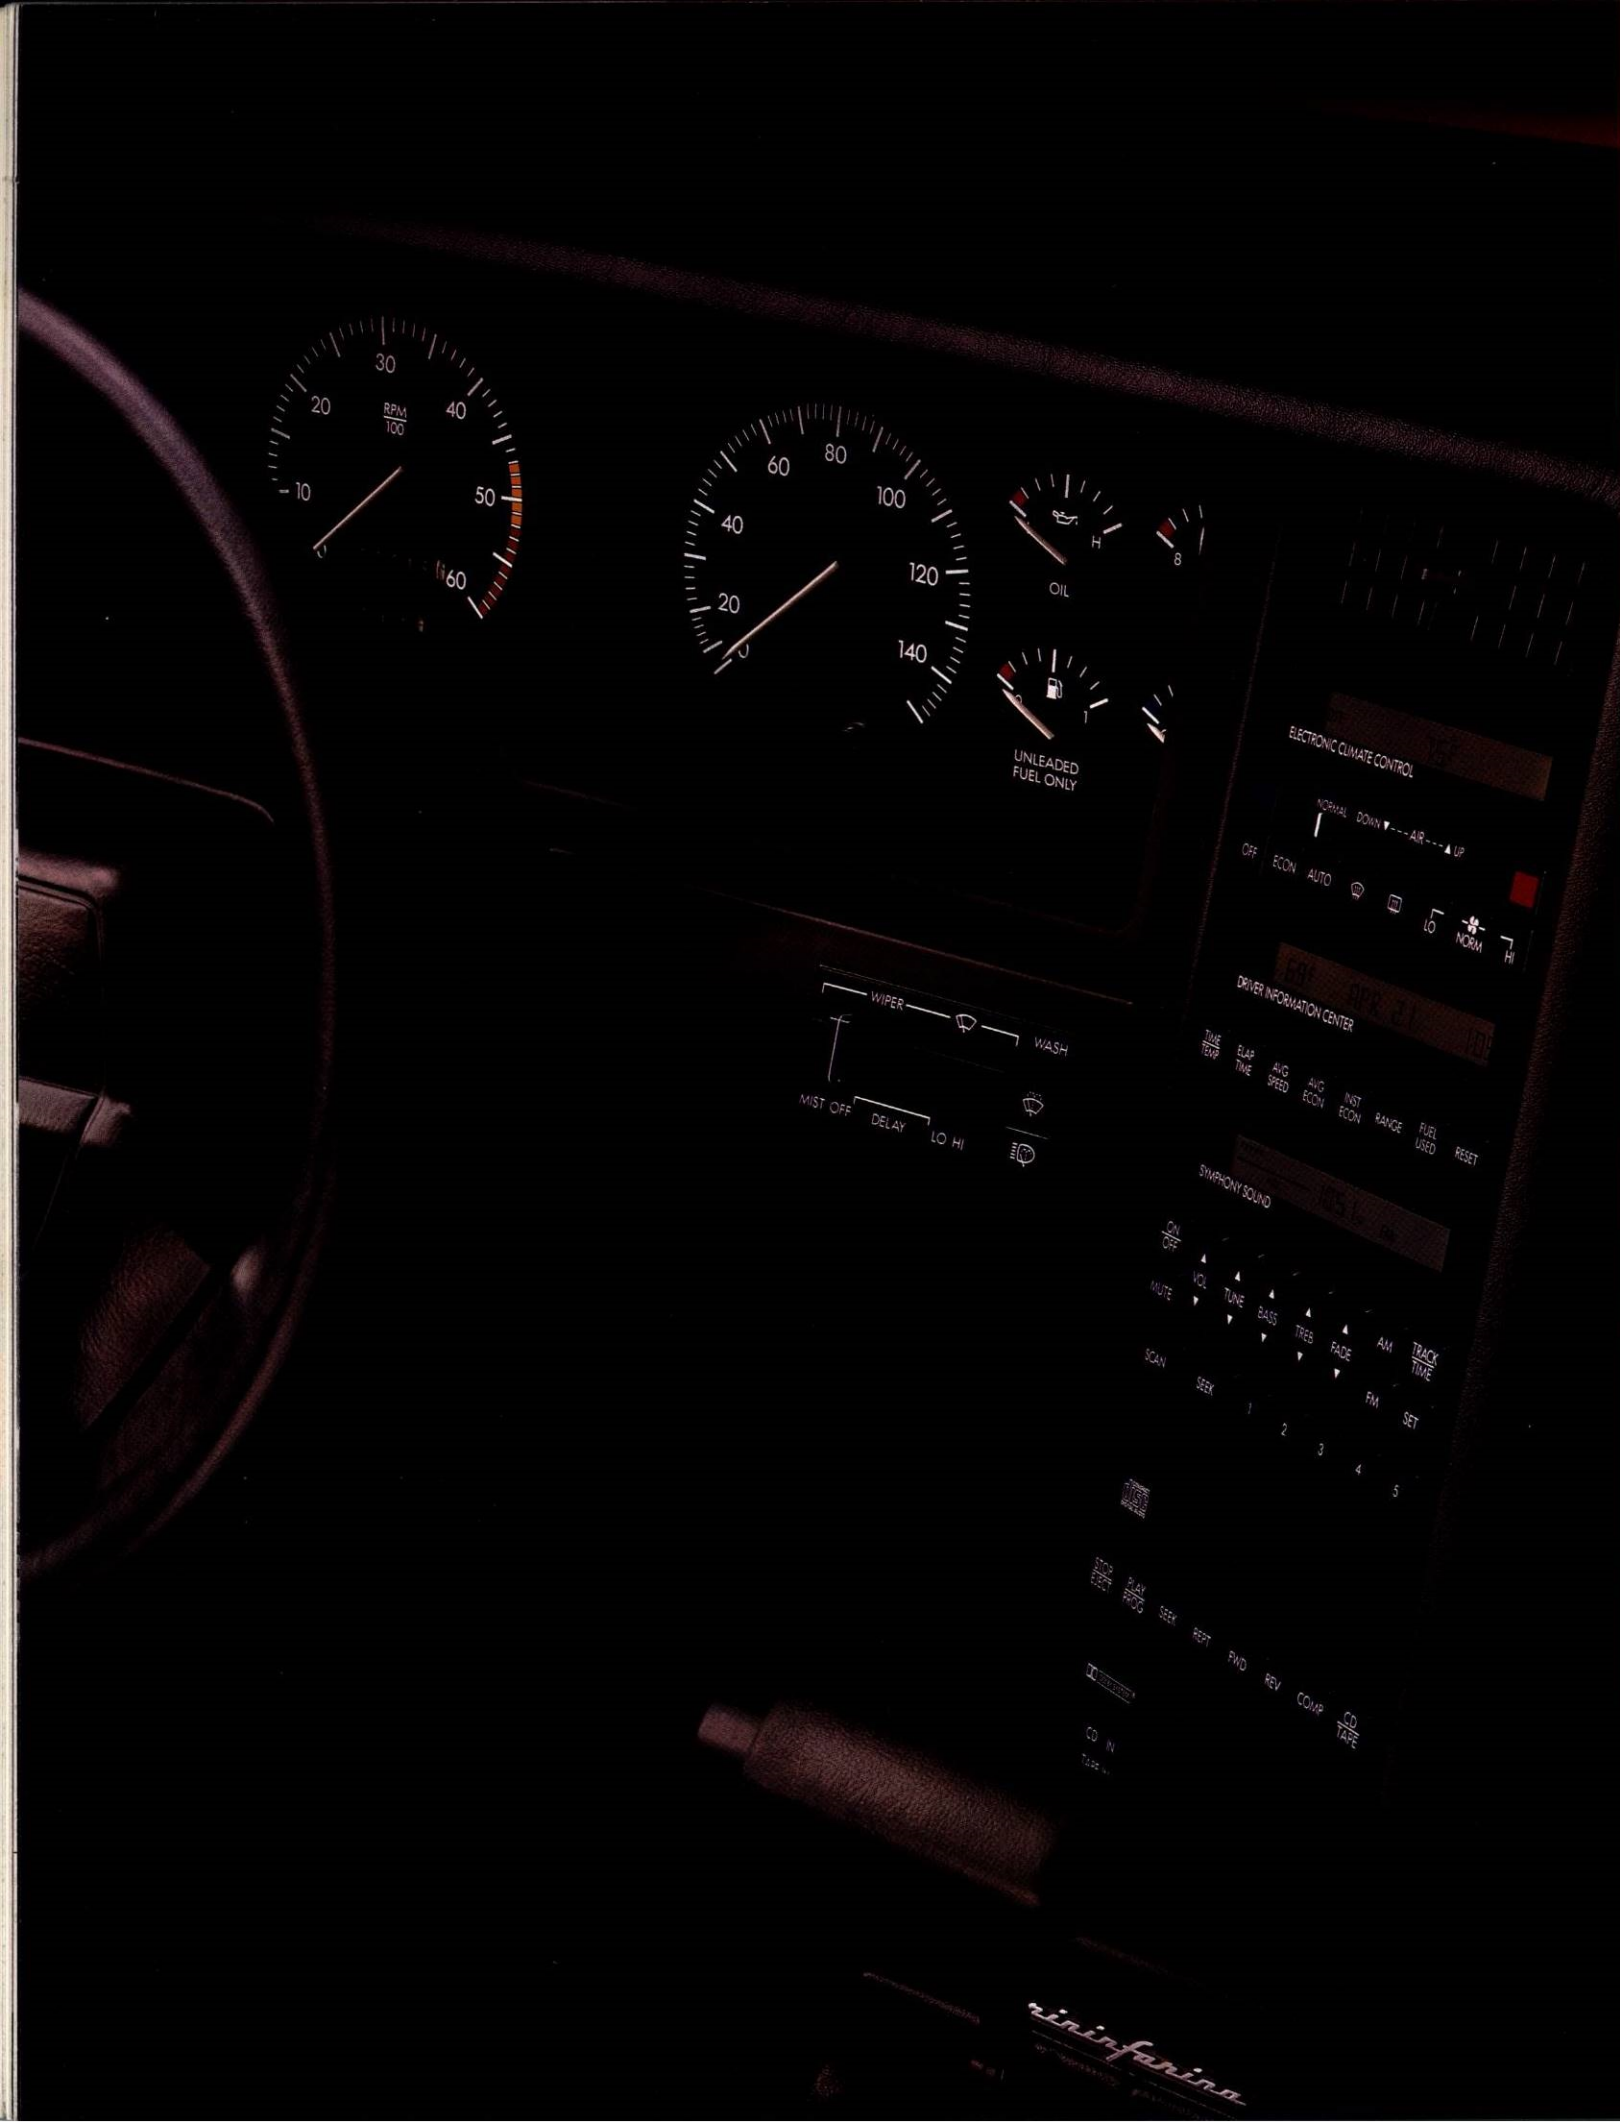

Allanté was the first car in the world equipped with the reassuring control of Bosch III anti-lock brakes.

A washer helps keep Allanté's integral headlamp/foglamp clean for maximum visibility.

Allanté's advanced driving systems react to changing vehicle speeds. The Speed Dependent Damping system automatically adjusts the strut damping of the fully independent suspension. The result: isolation from bumps in city driving and increased control for highway travel. Speed-sensing variable assist steering provides parking ease, as well as highway stability.

**Comfort and convenience
previously unheard-of
in a roadster.**

Allanté affords you unequalled comfort and convenience through whisper-quiet aerodynamics. Ten-way, power-adjusting Recaro® seats with supple, hand-matched Italian leather seating areas. One of the world's finest electronic climate control systems. Plus power headlamp washers. Express-down windows. Central door unlocking. And a PASS Key® theft-deterrent system.

⌋ Analog instrumentation allows you to monitor driving systems at a glance.

⌋ With the most luggage space of any roadster sold in America, Allanté's pass-through compartment design accommodates skis, golf clubs and more.

⌋ Computer-based lamp control, a worldwide exclusive, senses when a front lamp burns out, notifies the driver, and automatically illuminates a lamp nearby.

⌋ With the touch of a button, Allanté's new power-latching roof design automatically reattaches the soft top.

⌋ Allanté's digital instrument panel (shown above) and analog instrument panel (shown facing page) both include a driver's side Supplemental Inflatable Restraint system (air bag) concealed in the steering wheel hub.

SPECIFICATIONS

Two Models:

- Hardtop/Convertible with hard and soft top, your choice of digital or analog instrument panel.
- Convertible with soft top, analog instrument panel or available digital instrument panel.
- 4.5 liter tuned V8.
- Traction Control.
- Unique four-speed automatic transmission with overdrive.
- BOSCH III anti-lock brake system (ABS).
- Fully independent four-wheel suspension with enhanced Speed Dependent Damping.
- Power rack and pinion variable assist steering.
- Exclusive P225/55VR16 Goodyear Eagle V-rated tires on 16" x 7" forged aluminum alloy wheels.
- 99.4" wheelbase, 178.7" length.
- 16.3 cu.-ft. luggage space with pass-through.

• The 1991 Brougham. Featuring the uncompromising luxury and elegance of full-size, six-passenger comfort. The style and elegance of a classic design. And the inherent luxury of a true automotive legend.

Brougham™ shown in Sable Black.

Cadillac Brougham.
An American classic.

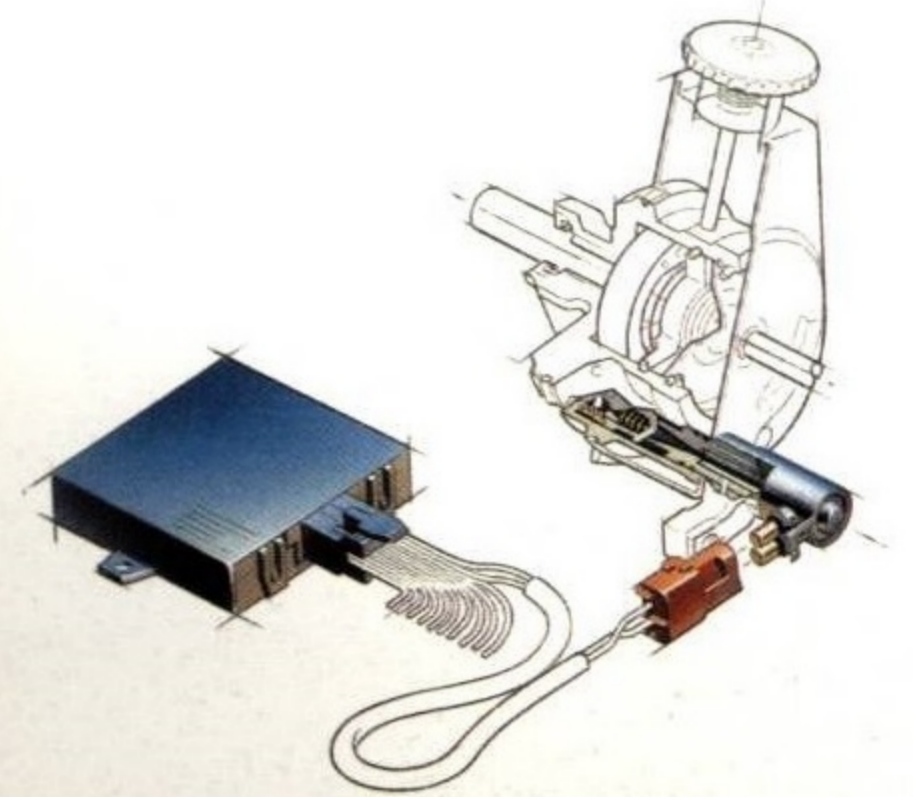

Brougham once again displays a perfect blend of comfort and convenience. With six-way, power-adjusting front seats. A leather-wrapped steering wheel rim with tilt and telescoping functions. The smooth ride of an improved suspension, and operational ease of new electronic variable assist steering. An AM stereo*/FM stereo radio with cassette player. And perhaps the most comforting feature of all: Cadillac's impressive ownership services program.

*See page 72

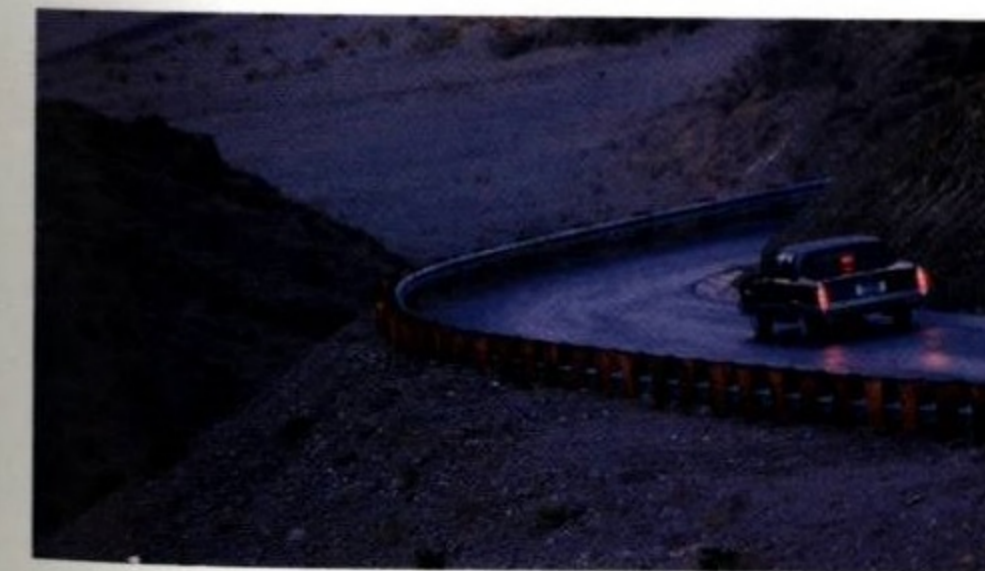

Composite headlamps and styling refinements enhance Brougham's classic design.

Brougham's easy-to-read digital instrument panel puts controls and convenience features within comfortable reach.

New standard electronic variable assist steering controller monitors vehicle speed to automatically adjust steering for added stability at higher speeds and reduced effort when parking.

Standard Bosch II anti-lock brakes help you maintain steering control when braking on virtually any road surface.

A mere touch of the power trunk lid release displays 19.6 cubic feet of luggage space.

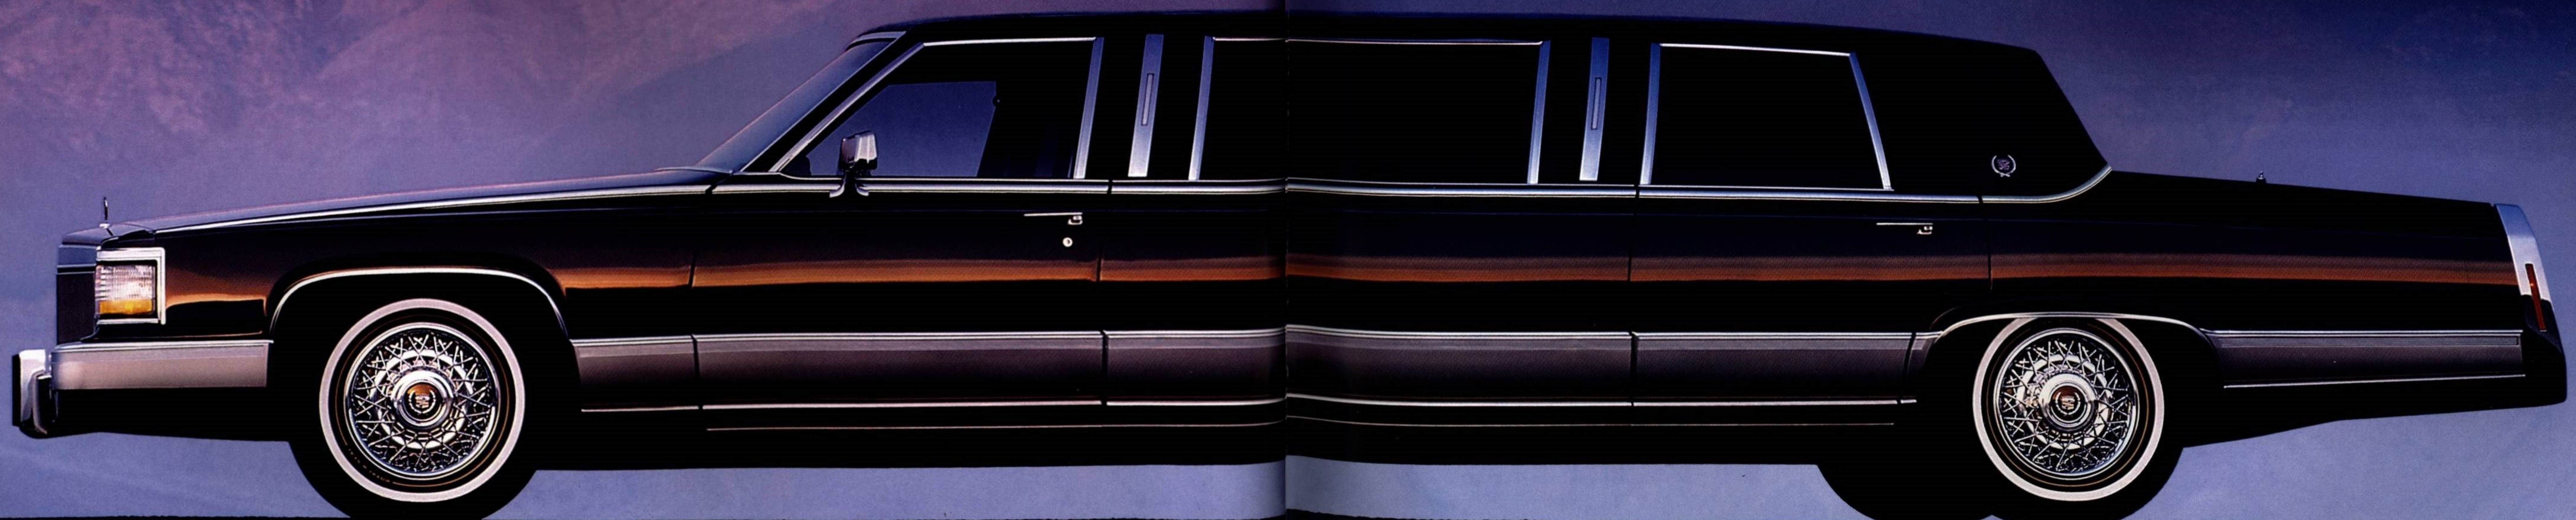

A standard 5.0 liter fuel-injected V8 engine, new for 1991, generates 170 horsepower and 255 lbs-ft. of torque for impressive response.

An available 5.7 liter V8 engine provides 185 horsepower and 300 lbs-ft. of torque. It is included in the available trailer towing package.

When the premium coachbuilders set out to build custom limousines of unparalleled distinction, they look to Cadillac. With the timeless elegance of an American classic. And a level of comfort and convenience that has become legendary.

All limousines are available through manufacturers, retailers and establishments that are not part of the Cadillac Motor Car Division.

Availability, price and quality of these items rest solely with the respective manufacturers and their sales organizations.

Every 1991 Cadillac offers premium sound, standard.

Radios in front-drive Cadillacs offer seven station presets per band with only four pushbuttons. Allanté offers nine presets per band using five pushbuttons. In Fleetwood, De Ville, Eldorado and Seville, a five-band graphic equalizer lets you tailor the sound to your preference. Brougham offers the sophisticated convenience of five automatic tone control presets for effortless listening.

You can select compact disc playback for even greater sonic realism, standard in Allanté and available in every Cadillac.

Delco/Bose Gold Series sound systems, standard in Allanté (called 200 Series) and available in every front-drive Cadillac, offer you up to 200 watts total power and custom equalization matched precisely to your Cadillac's interior.

No matter which sound system you select, you get extraordinary technology that makes operation simple.

*Receives C-Quam® stereo broadcasts. Most AM stereo stations across the country broadcast in C-Quam® but some do not. Check with your local stations for compatibility in your area.

Delco/Bose Gold Series sound system offers compact disc realism, seek/scan AM stereo*/FM stereo radio, and is custom-equalized for each interior. Available for all front-drive Cadillacs except Allanté.

Delco/Bose Gold Series sound system offers seek/scan AM/FM stereo radio, full-featured auto-reverse cassette tape, and is custom-equalized for each interior. Available for all front-drive Cadillacs except Allanté.

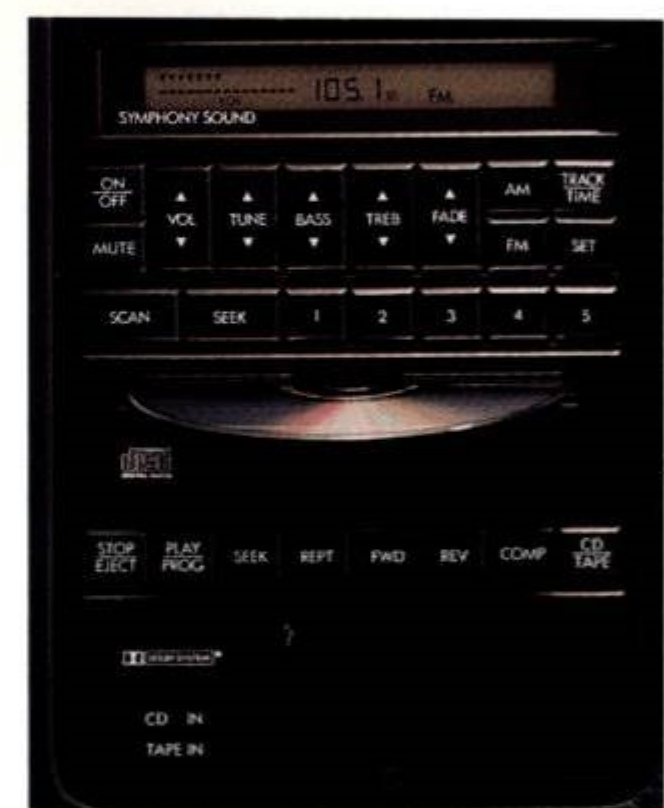

Fleetwood, De Ville, Eldorado and Seville standard premium sound system. Seek/scan AM stereo*/FM stereo radio and full-featured auto-reverse cassette tape for three kinds of stereo. Seven-station pushbutton tuning on each radio band. Five-band graphic equalizer.

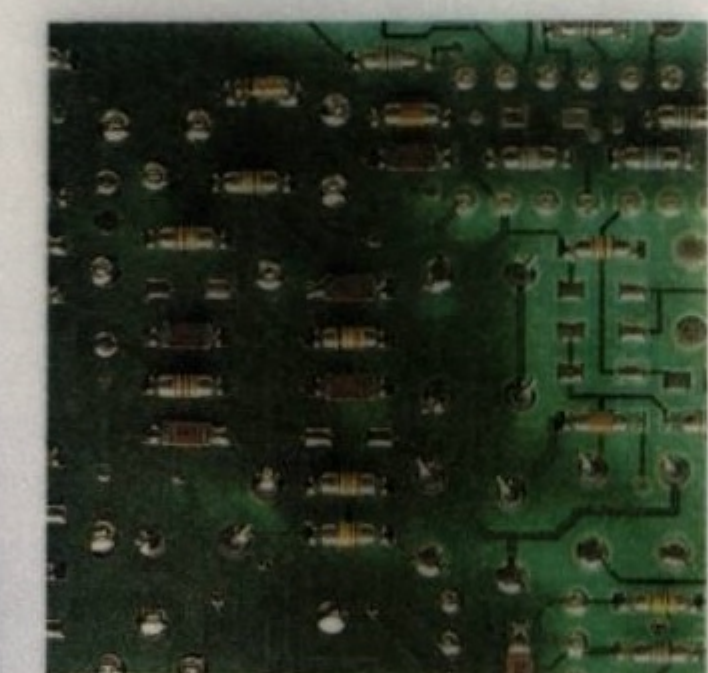

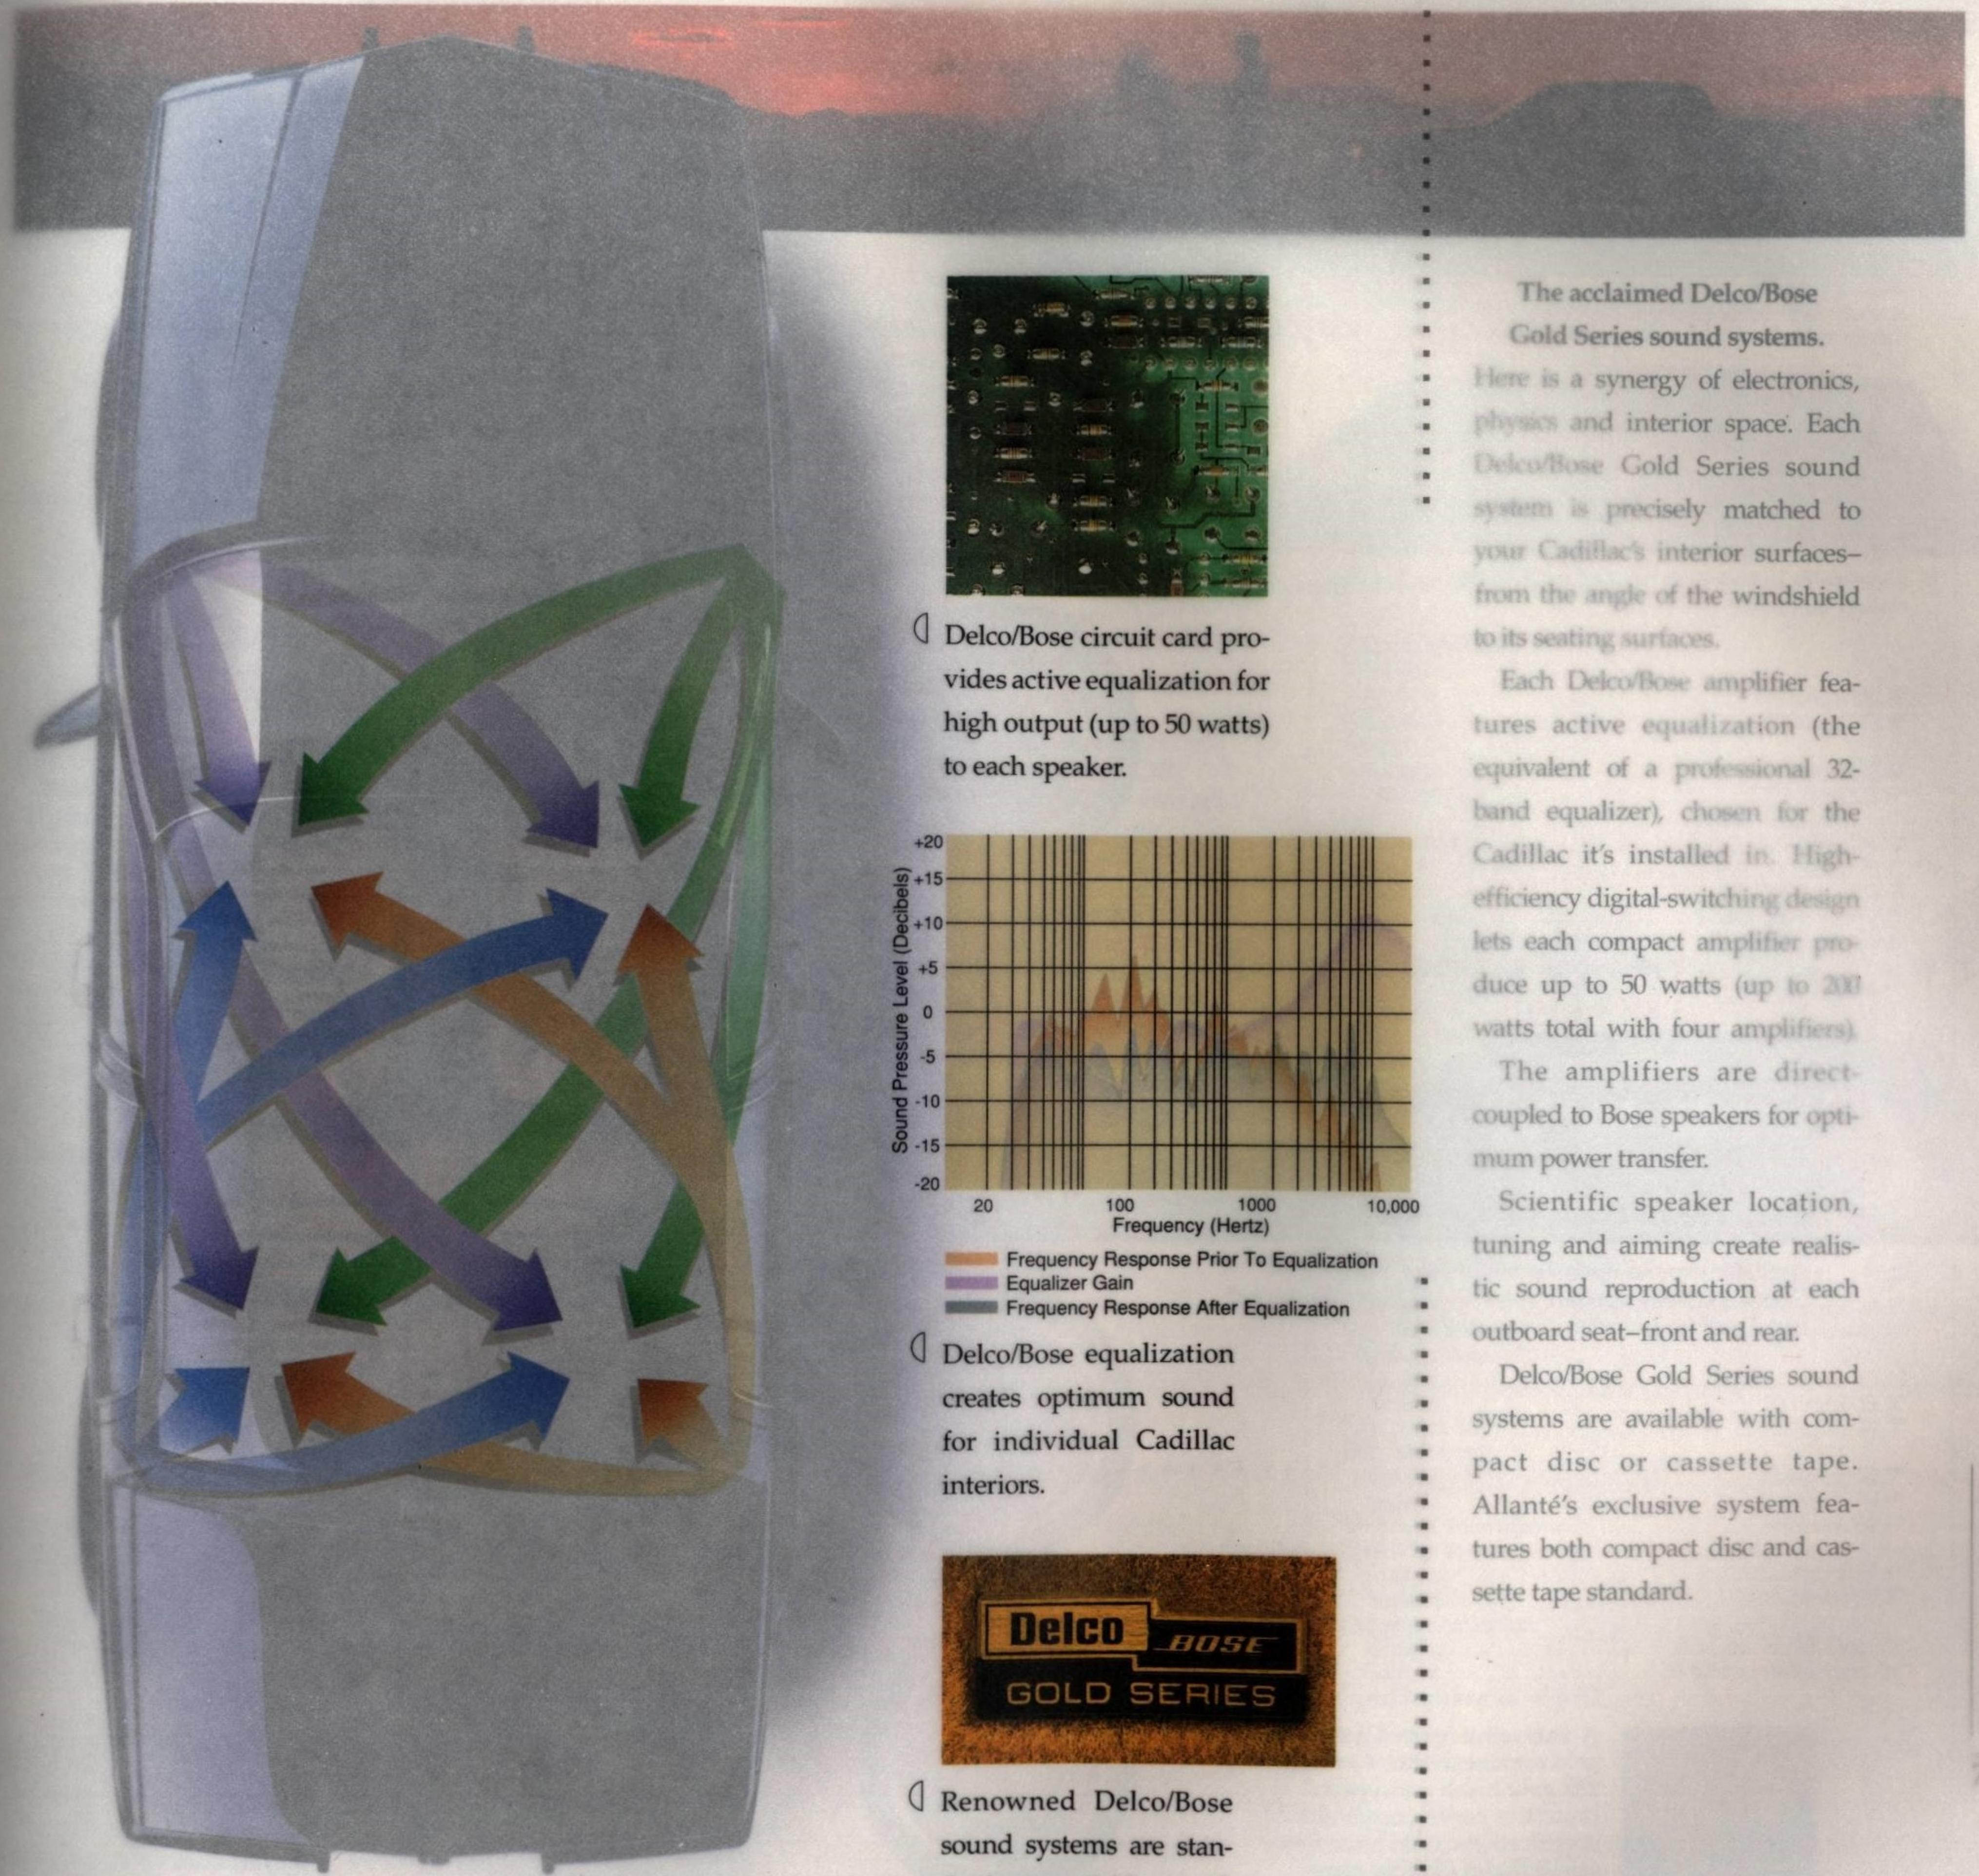

New Brougham available Delco premium sound system now includes both compact disc realism and full-featured auto-reverse cassette tape along with seek up-down/scan up-down AM stereo*/FM stereo radio and five automatic tone control presets. Powerful amplifiers, door-mounted front speakers and large rear speakers enhance sound.

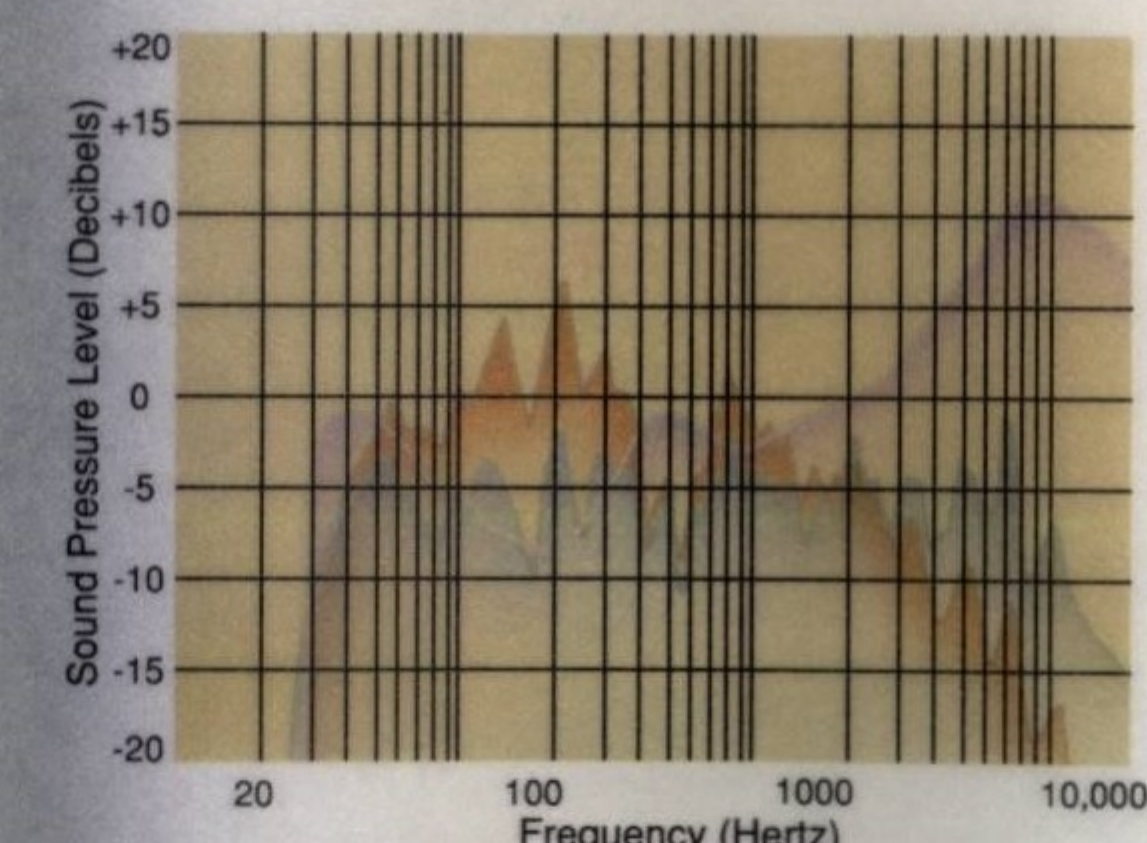

Brougham's standard Delco seek up-down/scan up-down AM stereo*/FM stereo radio, full-featured auto-reverse cassette tape, and five automatic tone control presets. Advanced technology makes it easy to operate.

Allanté's standard Delco/Bose 200 Series sound system. Now twice the power (200 watts total) for greater clarity at higher listening levels. Features both compact disc realism and full-featured auto-reverse cassette tape along with AM stereo*/FM stereo radio, and is custom-equalized for the interior.

Delco/Bose circuit card provides active equalization for high output (up to 50 watts) to each speaker.

Frequency Response Prior To Equalization
Equalizer Gain
Frequency Response After Equalization

Delco/Bose equalization creates optimum sound for individual Cadillac interiors.

Renowned Delco/Bose sound systems are standard or available on all front-drive Cadillacs.

The acclaimed Delco/Bose Gold Series sound systems.

Here is a synergy of electronics, physics and interior space. Each Delco/Bose Gold Series sound system is precisely matched to your Cadillac's interior surfaces—from the angle of the windshield to its seating surfaces.

Each Delco/Bose amplifier features active equalization (the equivalent of a professional 32-band equalizer), chosen for the Cadillac it's installed in. High-efficiency digital-switching design lets each compact amplifier produce up to 50 watts (up to 200 watts total with four amplifiers).

The amplifiers are direct-coupled to Bose speakers for optimum power transfer.

Scientific speaker location, tuning and aiming create realistic sound reproduction at each outboard seat—front and rear.

Delco/Bose Gold Series sound systems are available with compact disc or cassette tape. Allanté's exclusive system features both compact disc and cassette tape standard.

IMPORTANT WORDS ABOUT...

THIS CATALOG

We have tried to make this catalog as comprehensive and factual as possible. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment specifications, models and availability. Since some information may have been updated since the time of printing, please check with your Cadillac dealer for complete details.

ENGINES

Cadillacs are equipped with engines produced by different operating units of GM, its subsidiaries or suppliers to GM worldwide.

ASSEMBLY

Cadillacs are assembled by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Cadillacs with different or differently sourced components than originally scheduled. All such components have been approved for use in Cadillacs and will provide the quality performance associated with the Cadillac name. Since some options may be unavailable when your vehicle is assembled, we suggest that you verify that your vehicle includes the equipment you ordered, or if there are changes, that they are acceptable to you.

MUSIC SYSTEM

- Premium music system: stereo radio with cassette tape and compact disc players; door-mounted speakers

APPEARANCE AND PROTECTION

Gold ornamentation
Paint, Firemist

Let's Get It Together... Buckle Up. 

about Cadillac products.

Cadillac monitors product performance in the field. We then prepare bulletins for servicing our products better. Now you can get these bulletins, too. Ask your dealer. To get ordering information, call toll-free 1-800-551-4123.

FINANCING OR LEASING, IT'S AS EASY AS GMAC®

Financing is done right in the showroom. Terms are tailored to suit your personal needs. You can choose your monthly payment date.

CORROSION PROTECTION

Cadillacs are designed and built to resist corrosion. All body sheet-metal components are warranted against rust-through corrosion for 6 years/100,000 miles. Allanté is covered for 7 years/100,000 miles. There is no deductible for rust-through repairs. Application of additional rust-inhibiting materials is not required *under the corrosion coverage* and none is recommended.

WARRANTY

The GM 4-year/50,000-mile Gold Key Bumper to Bumper limited warranty covers repairs for any new Cadillac, including labor and parts, to correct any defects in material or workmanship occurring during the warranty period. The complete vehicle will be covered for 4 years or 50,000 miles, whichever comes first (except tires, which are covered by their manufacturer, adjustments, normal maintenance items and battery, which is covered by its own 4-year/50,000-mile prorated warranty). The Cadillac Allanté is backed for 7 years/100,000 miles. There is no deductible on any Cadillac warranty. See your Cadillac dealer for terms of these limited warranties.
