

The 2015 E-Class.

Sedan & Wagon.

Mercedes-Benz
The best or nothing.

The 2015 E-Class Sedan & Wagon.

Instantly recognized, the E-Class is designed for virtuoso performance for those accustomed to the passing lane.

An engine as advanced as it is powerful.

The E 400 4MATIC™ Sedan and Wagon feature the new 3.0L Bi-turbo V6 engine. This innovative powerplant combines two turbochargers with state-of-the-art direct injection and four valves per cylinder. The result is significant improvements in performance and extra torque while achieving greater fuel efficiency: 329 horsepower; 354 lb-ft of torque, and acceleration of 0-100 km/h in under 6 seconds.

Performance under pressure.

Mercedes-Benz has long been recognized for innovation in safety technologies, as evidenced by COLLISION PREVENTION ASSIST PLUS

with autonomous braking, designed to lessen the danger of rear-end collisions and mitigate the consequences of accidents. This system continuously monitors the distance from the vehicle ahead, warning you if it senses a danger of collision and optimizing the braking power based on distance.

The world at your command.

The latest generation of COMAND is now equipped with an internet browser and MB Apps that allow you to browse the internet while stationary and use Mercedes-Benz Apps while on the move. You can search via Google, download your route via Google maps and view images from available traffic cameras.

Active LED headlamps:

Active LED headlamps generate light that is closer to natural daylight than traditional Bi-Xenon lamps. Bright white LED daytime running lamps express the legendary four-lamp face of the E-Class in a modern style. And Active Curve Illumination adjusts the beam to maximize illumination along curving roads.
