CITROËN
C1
INTRODUCING...

CITROËN C1 UNIQUE STYLING

STYLISH, SIMPLE, EFFORTLESS.
FORM AND FUNCTION ARE IN
PERFECT HARMONY WHEREVER
YOU LOOK ON THE CITROËN C1.

THE CURVES AND FORMS AND TECHNOLOGY THAT MAKE IT UNIQUELY DISTINCTIVE, ALSO MAKE IT EASY, FUN AND SAFE TO TRAVEL IN. FROM THOSE SHORT OVERHANGS AND ROBUST BUMPERS TO THE CLEVERLY PLACED CLEAR CONTROLS, THE DETAILS MAKE A WORLD OF DIFFERENCE.

› LIGHT FANTASTIC

Elevated rounded headlamps make the Citroën C1's characterful face instantly recognisable. The transparent rear light clusters house eye-catching triangular crystal designs.

› MIRROR IMAGE

The uniquely shaped, manually adjustable door mirrors blend beautifully into the fresh, friendly overall design. On VTR+ models they are body coloured.

> HANDLE WITH FLAIR

Vital driving controls are grouped closely around the steering wheel for fingertip control, so the driver can concentrate on the main event – driving.

> GO WITH THE FLOW

Even the cabin's air vents harmonise with the Citroën C1's curvy themes – nothing interrupts the flow!

> GO WITH THE GLOW

Using a backlit translucent material, the heating control panel glows a friendly, easy to read orange when the lights are on.

> OUTSIDE IN

A stylish flourish – the upper door panels are painted to match the chosen exterior colour.

FREEDOM IN COMFORT.

COMPACT, AGILE AND DESIGNED TO RAISE A SMILE EVERY TIME YOU JUMP IN, THE CITROËN C1 INSPIRES A SENSE OF FREEDOM, EVEN ON THE BUSIEST CITY STREETS. WHAT'S THE SECRET? A MIXTURE OF VIBRANT STYLING, PRACTICAL THINKING AND PURE VERSATILITY IN ONE UNIQUE PACKAGE.

> DUCK AND DIVE

An amazingly tight turning circle and standard variable power assisted steering make the Citroën C1 perfectly adapted to nipping about in the city.

> CLEAR REAR

The large rear window is also a wide opening tailgate for optimum access to the boot.

> MUSIC NON-STOP

A CD Player is standard, and in addition you can plug your MP3 player into the front panel.

> DIAL STYLE

The clear and bold speedometer really adds to the sense of fun in the Citroën C1. VTR+ models also feature a brilliant rev counter.

CITROËN C1 A CONVENIENT FREEDOM

> IN THE DETAILS

Even the shape of the main air conditioning switch echoes the dashboard design and the whole car's vibrant persona.

> SUPERSTORE

The Citroën C1 has no fewer than 12 storage compartments spread between the dashboard, centre console and doors – there are two situated immediately above and below the CD player for really easy access.

> IT'S ELECTRIC

As you would expect, electric front windows are standard on VTR+ models for complete convenience.

> HIDDEN ASSETS

Two cup holders and a 12 volt socket are concealed under the centre console.

> HIGH VOLUME

The boot transforms from a useful 139 litres under the parcel shelf, right up to 751 litres with the rear seats folded down. This is still a capacious 712 litres on 3-door models.

CITROËN
C1
THE
ENVIRONMENTAL
BENCHMARK

AN ENVIRONMENTAL STAR. PERHAPS IT'S NO SURPRISE. A CAR DESIGNED TO WORK BRILLIANTLY IN THE CITY, WITH MINIMAL DIMENSIONS AND MAXIMUM EFFICIENCY IS GOING TO BE ENVIRONMENTALLY FRIENDLY...

BUT BEING GOOD IS NOT ENOUGH FOR THE CITROËN C1. CLASS BEATING ENVIRONMENTAL CREDENTIALS INCLUDE EXTRAORDINARY CO₂ EMISSIONS OF JUST 106G/KM FOR 1.0i PETROL MODELS, ONE OF THE LOWEST FIGURES FOR ANY CAR CURRENTLY ON SALE IN THE UK AND ENABLES EVERY MODEL IN THE RANGE TO BOAST AIRDREAM STANDARDS.

› LOW MEANS LOW

The lively, efficient 1.0i 12V 68hp petrol engine can reach up to 72.4mpg on the extra urban cycle, and even around town it will return 51.4mpg. The big news is of course the class defining 106g/km CO₂ figure, which makes the nippy petrol engined Citroën C1 a proper environmental star.

› MILES AND MILES PER GALLON

The Citroën C1 also comes with a flexible and amazingly frugal diesel engine. Only just behind the petrol engine for CO₂ performance, the headline grabbing figure is its ability to return up to 83.1mpg on the extra urban cycle.

CITROËN C1 SAFETY WITHOUT COMPROMISE

THE SAFE HAVEN. THE CITROËN C1 MAJORS ON SAFETY BECAUSE HERE, THERE'S NO ROOM FOR COMPROMISE.

WITH A MASSIVELY STRONG PASSENGER COMPARTMENT AND CAREFULLY ENGINEERED CRUMPLE ZONES, THE WHOLE STRUCTURE IS DESIGNED FROM THE GROUND UP TO PROTECT, AND IT'S PACKED WITH THE LATEST SAFETY TECHNOLOGY.

> AIRBAGS

A driver's and front passenger's airbag is fitted to all Citroën C1 models, and the VTR+ also features front lateral airbags for maximum protection.

> ISOFIX

On VTR+ models there are Isofix child seat anchorage points on the rear split/folding 50/50 seats – little people go safely.

> ABS WITH EBD

ABS comes as standard on all Citroën C1s, and it's coupled with Electronic Brakeforce Distribution (EBD) which keeps your brakes in perfect balance and you in control, whatever the circumstances.

> SAFE AND SECURE

The Citroën C1 also protects itself, with an immobiliser and on VTR+ models high-frequency remote control central locking as standard.

PERSONAL CHOICE. THE CITROËN C1 COMES IN TWO DISTINCT FLAVOURS AND TWO BODY STYLES. WHICHEVER FEELS RIGHT, YOU WILL BE CHOOSING A GREAT CITY CAR WITH PERSONALITY TO SPARE.

VT: STREETWISE AND STYLISH.

STEP INTO THE CITROËN C1 VT AND THE VIEW IS INSTANTLY DIFFERENT. NARROW BUSY STREETS LOOK WIDER. PARKING SPACES APPEAR AND GAPS IN THE TRAFFIC SEEM TO GROW.

With the Citroën C1's generous glazed area and super-compact dimensions you can make the most of it all, especially thanks to the clever variable power assisted steering that adapts to every new twist and turn. With VT models you can adjust the steering wheel to exactly the right height and relax with your chosen CD.

› 5. PARKING SENSORS (FRONT & REAR)

Parking becomes stress-free with Citroën's front and rear parking sensor kit, which is subtly integrated into your new Citroën C1's bumpers.

GREEN EFFICIENCY. CITROËN HAS BEEN PIONEERING CLEANER, MORE FUEL-EFFICIENT MOTORING, SUCH AS THE COMMON RAIL HDi ENGINES NOW FITTED IN ALL NEW CITROËN DIESELS, LONG BEFORE ALL THE HYPE...

CITROËN HAS ALWAYS BEEN AT THE FOREFRONT OF GREENER TECHNOLOGY AND THE CITROËN C1 IS NO EXCEPTION. TODAY, WE HAVE ONE OF THE UK'S WIDEST RANGES OF LOW EMISSION VEHICLES – THREE OF WHICH ARE IN THE TOP FOUR FOR LOW CO₂ AND FUEL-EFFICIENCY. WE ALSO PRODUCE ONE OF THE UK'S MOST ECONOMICAL LIGHT COMMERCIAL VEHICLES, THE CITROËN NEMO VAN.

› INTRODUCING A MORE ECOLOGICAL CAR

The Citroën C-Cactus concept, a car designed on ecological principles. It includes a significant proportion of recycled or recyclable materials and, like the plant it is named after, it is low on liquid consumption. At the same time, Citroën C-Cactus is designed to be no more expensive than a mid-range family car. This can be attributed to the use of new materials and to a rational design process using a smaller number of parts. Citroën C-Cactus is an essential vehicle reflecting a new vision of the car, many of its thoughts and themes will appear in modern Citroën vehicles to come.

› AIRDREAM – A BENCHMARK

When it comes to the environment we wanted to show our genuine commitment as well as our profound expertise, so we have devised a benchmarking scheme with the signature 'Airdream' reserved exclusively for the cleanest vehicles in our range. To qualify for the Airdream signature, vehicles must meet three standards:

1. a) CO₂ emissions of 120g/km or less
- b) fitted with DPFS with CO₂ below 158g/km.
2. Manufacturing quality of ISO14001.
3. 95% of recoverable materials.

› HIGH-PRESSURE DIRECT INJECTION DIESEL ENGINE

Our HDi diesel engines operate with the fuel under extremely high pressure, enabling microscopically precise injection control. With this level of management it's possible to inject at different times during the same engine stroke allowing total control over the combustion process. This has allowed our engineers to reduce carbon monoxide emissions by 40%, unburned hydrocarbons by 50% and engine particulates by 60%. Fuel consumption is 20% lower than a prechamber diesel engine, resulting in an equivalent reduction in CO₂ emissions and thanks to the torque available at low engine speed it could be argued that driveability is now better than in petrol engined cars.

› ANTI-LOCK BRAKING SYSTEM (ABS)

Computer-controlled braking assistance designed to prevent the wheels from locking under extreme braking. This enables the car to continue being steered and therefore controlled during this braking incident. The Citroën C1's ABS system is further enhanced with EBA and EBD.

› ELECTRONIC BRAKEFORCE DISTRIBUTION (EBD)

A conventional ABS system cannot account for any of the four wheels wanting to lock more quickly than the others (for example, two of the wheels may be on snow and two on tarmac). EBD reads the deceleration rate of each wheel individually and applies the ABS principles accordingly.

› ISOFIX

A standardised and more simple method for installing child seats, each seat is 'clicked' into place via a three point system. On the Citroën C1, VTR+ models have Isofix installed on the two rear seats.

› CORNERING STABILITY CONTROL (CSC)

When braking on a bend, the weight applied to the wheel on the inside of the turn is less than the weight applied to the wheel on the outside of the turn. If the braking pressure is identical on the wheel on the inside of the turn and on the wheel on the outside of the turn, the vehicle tends to move straight ahead, therefore under-steering. The CSC function distributes the pressure on the right and left wheels in such a way as to slow the vehicle down while guaranteeing its steerability.

› VARIABLE POWER ASSISTED STEERING

A system that provides extra power assistance for a vehicle's steering at low speeds (such as turning a sharp corner) and less assistance during high-speed situations.

› FRONT SEAT BELT PRE-TENSIONERS

In the event of a crash, a pre-tensioner will tighten the seat belt almost instantaneously. This reduces the load on the occupant in a violent crash. Like airbags, pre-tensioners are triggered by sensors in the car's body, and use explosively expanding gas to drive a piston that retracts the belt. Seatbelt pre-tensioners also lower the risk of "submarining", which is when a passenger slides forward under a loosely worn seat belt.

› RADIO DATA SYSTEM (RDS)

A traffic information on FM radio, allowing the station name and other information to be transmitted alongside audio information.

› ELECTRONIC STABILITY PROGRAMME (ESP)

This is computer-controlled traction assistance and is provided primarily through the braking systems. The ESP's control unit constantly compares where the driver intends going (through the position of the steering wheel) with where the vehicle is actually going and, if necessary, makes speed corrections to each wheel individually through braking or engine torque to keep the vehicle 'in line'.
