

The Mercedes-Benz Truck range

Mercedes-Benz
Trucks you can trust

The big star in *Road* Efficiency

At Mercedes-Benz we are dedicated to providing each and every one of our customers with innovative and comprehensive solutions for total transport efficiency. We call this continued drive RoadEfficiency.

So what does RoadEfficiency mean for you and your business?

Low total costs

Everything we do aims to deliver low total costs for our customers, from the outset and throughout a truck's life.

- › Innovative, market leading fuel-saving technology – our 2nd generation engines and powertrain can achieve up to 6% fuel savings.
- › Low repair and maintenance costs
- › Competitive finance options
- › High residual values

Greater safety

Always ahead of the curve in truck innovation, Mercedes-Benz Trucks now offer the latest in safety systems.

- › Active Brake Assist 4 with pedestrian safety – this technology is unrivalled by any other truck manufacturer.

Maximised use

Mercedes-Benz Uptime ensures maximum availability of your vehicles at all times. It is a ground-breaking service product, based on real-time monitoring of your vehicles, significantly increasing the efficiency of your fleet. Uptime builds upon the telematics and connectivity-based innovations we've been offering with Fleetboard for over 15 years.

Contents

Everything we do is driven by our total commitment to deliver RoadEfficiency to each and every one of our customers.

Low total costs
+ greater safety
+ maximised use

Efficiency is the sum of the details

Atego

The Atego is a winner on all fronts, offering the attributes to suit your tasks whatever the application. Value, efficiency and dedication are all embodied in the Atego – all the way from 7.5 to 16 tonnes.

A wealth of new features are added to the outstanding qualities of its predecessor, including standard fitment of the new Mercedes PowerShift 3 automated gearshift system across the range. Add to this the range of fuel-efficient 4 and 6-cylinder engines, and the Atego offers a driving experience second to none. With a level of quality and comfort only matched by its larger siblings – the Antos, Arocs and Actros – the Atego is a real all-round professional in distribution and construction applications.

Vehicle summary

Market sector	Light and medium duty distribution, construction industry transport and specialist applications
Usage	On-road and off-road
Weight range	7.5-16 tonnes
Cabs	Choice of 5 day, sleeper and crew cabs
Chassis	Rigid 4x2 and 4x4/Tractor 4x2
Engines	160-299 hp
Transmissions	Automated, manual and automatic

For more information visit mbtrucks.co.uk/atego

Antos

The Antos. Both a milestone and a benchmark for the future.
A whole new class of truck that has been specifically developed
for distribution work from 18 tonnes upwards.

Built to cater exactly to your requirements across all applications, from grocery transport and retail supply services, to tanker and dry-bulk haulage, providing practical, comfortable cabs and responsive, dynamic powertrain configurations featuring fuel-saving, low-emission engines, as well as extremely safe, assured driving characteristics. The Antos is also backed up by low repair and maintenance costs, complete ease of body mounting and a diverse product portfolio – including special model variants designed for payload-sensitive and volume-oriented haulage.

Vehicle summary

Market sector	Heavy duty distribution
Usage	On-road
Weight range	18-44 tonnes and heavy haulage up to 120 tonnes
Cabs	Choice of 6 day cabs
Chassis	Rigid (2 and 3 axles)/Tractor (2 and 3 axles)
Engines	238-625 hp
Transmission	Automated

For more information visit mbtrucks.co.uk/antos

Arocs

The Arocs continues the 110 year old tradition of Mercedes-Benz construction industry vehicles and takes it into the future with innovative, future-oriented technology.

Designed from the ground up to provide a reliable, high-torque, flexible drive configuration to suit the construction industry down to the ground. This is where it also puts the power – to the ground, with frame and suspension configurations designed to work both on and off-road. A robust design is not all that Arocs provides though. High payloads, outstanding reliability and low running costs are key to making the Arocs efficient and economical in everyday operation. Add to this mix a range of configurations and options to meet the needs of every operator and you have an enviable package.

Vehicle summary

Market sector	Construction industry transport
Usage	On-road and off-road
Weight range	18-44 tonnes and heavy haulage up to 250 tonnes
Cabs	Choice of 14 day and sleeper cabs
Chassis	Rigid, tipper, mixer, tractor (2, 3 and 4 axles)
Engines	238-625 hp
Transmissions	Manual and automated

For more information visit mbtrucks.co.uk/arocs

Actros

Putting everything that has gone before it in the shade, the Actros' modern cab offers the driver maximum comfort whilst delivering exceptional fuel economy.

The model range offers a vehicle configuration for just about any application in long-distance transport, and now provides an even more tailored solution. The addition of more cab variants, a wider choice of driveline and a multitude of new productivity, comfort and safety features combine to make your vehicle even more cost-effective to run. It's now easier and safer to drive, and more outstandingly capable than any other big truck that's gone before it.

Vehicle summary

Market sector	Long distance transport
Usage	On-road
Weight range	18-44 tonnes and heavy haulage up to 250 tonnes
Cabs	Choice of 11 sleeper cabs
Chassis	Rigid (2 and 3 axles)/Tractor (2, 3 and 4 axles)
Engines	238-625 hp
Transmission	Automated

Econic

The Econic has become one of the safest multi-tasking trucks available with its unmatched visibility for the driver.

The ease of access and panoramic visibility embodied in the Econic make it the ideal truck for uses as varied as refuse collection or recycling, road maintenance and construction, urban distribution, as a fire appliance, or even airside duties.

The Econic is not only safe by design but also offers additional safety through driver assistance systems including Active Brake Assist 3 as standard, Blind Spot Assist and Rearguard Assist as options, all helping to protect road users both in and outside of the cab, as well as protecting your business.

Vehicle summary

Market sector	Municipal and specialist applications
Usage	On-road and off-road
Weight range	18-32 tonnes
Cabs	Low and high roof crew cab
Chassis	Rigid (2, 3 and 4 axles)/Tractor (2 axles)
Engines	299-354 hp diesel, 298 hp natural gas
Transmission	Automated and automatic

For more information visit mbtrucks.co.uk/econic

Safety

Developing innovative safety systems has long been a focus for Mercedes-Benz Trucks, placing us at the forefront of safety technology. Trucks that are very safe are not just an important development for all road users. They are also more efficient, because accident-related downtime and repair costs reduce too.

Just some of these safety systems include Stability Control Assist, Proximity Control Assist, Roll Control Assist (for rigid only) and Attention Assist.

Our latest development is an enhancement to our active braking system – Active Brake Assist 4. This safety system, available as an option on many models, provides additional support to the driver where there is a risk of a collision with a pedestrian. It is the first and only system which actively protects pedestrians, potentially saving lives in an urban environment. It can safeguard the reputation of your business as well as potentially saving you money in accident damage, lost working time and insurance premiums.

For the ultimate in visibility, there is also the Econic which offers panoramic fields of vision and a lower driver seat position enabling eye contact with vulnerable road users at all times and on both sides of the vehicle.

Lower mounted cabs for increased visibility are also available on other models.

Mercedes-Benz Uptime

A revolutionary new telediagnosis system, Uptime monitors your truck in real time and shares the data with Mercedes-Benz to keep your truck performing at its very best.

Real-time support for customer repairs

Uptime gives you timely information and clear instructions on the maintenance tasks you can carry out yourself, including regenerating the diesel particulate filter, topping up fluids and correcting tyre pressure.

Efficient management of repair and maintenance work

Any repair and maintenance needs are detected at an early stage and automatically relayed to your chosen Service Partner. Based on this information, the Service Partner will bundle the pending repair and maintenance tasks and contact you to schedule an appointment. The workshop will be prepared for your visit and as a result, workshop visits and associated downtime are minimised.

Prevention of breakdowns

If your truck is in danger of breaking down you will be contacted immediately by the Mercedes-Benz Customer Assistance Centre. We will check availability of parts and resources, then arrange a workshop appointment that is optimally tailored to your vehicle route and transport assignments.

For more information visit mbtrucks.co.uk/uptime

Uptime is available for Actros, Antos and Arocs models produced from March 1st 2017, from as little as £10 per month.

Fleetboard

Fleetboard, a 100% Daimler owned company, is a leading supplier of the next generation of telematics and connectivity solutions. Fleetboard is used throughout the world to help customers drive efficiency throughout their supply chain, from tracking and telematics to real-time diagnostics with workshop integration.

The intelligent networking and transparency of vehicles, vehicle data, infrastructure and traffic systems, as well as all data for the driver and load, provide enormous benefits for customers. With solutions from Fleetboard you achieve maximum efficiency and minimum operating costs in driver, vehicle and logistics management through optimised vehicle usage, lower fuel consumption and increased vehicle availability.

The world of connectivity is evolving and so are we, keeping our customers ahead of the curve with leading edge technologies. Fleetboard Telematics. The future of connectivity, today.

Key benefits

- › Typically reduced fuel costs of 5%-15%
- › Provides a complete performance analysis of each truck and driver, collating impartial, comparable data from every cab
- › Covers vehicle management, time management and mapping
- › Maximises your vehicle and your fleets' driver performance and safety
- › Access current and historical Fleetboard data with your android-based smartphone, iPhone® or iPad®
- › Fleetboard App that allows fleet managers to track the locations of their vehicles and see how they are being driven
- › Proactive planning means less downtime, fewer detours and empty trips
- › Reduced administrative costs
- › Increased transparency within the transport process
- › More efficient, less expensive communications

Dealer Network

With its high level of continuous investment, our Dealer network is dedicated to keeping your business moving. Supporting our franchises across the UK is the Logistics Centre in Milton Keynes, carrying over £40m worth of Mercedes-Benz GenuineParts. In every way, we are dedicated to keeping your business moving. On average, 93% of parts requirements can be supplied within 24 hours, via a through-the-night delivery service.

With nationwide coverage of over 90 authorised repairers across the UK, the average Mercedes-Benz Dealer workshop is open over 100 hours per week, with many Dealers operating a full 24 hour service. To deal with any unforeseen incident, the UK network maintains over 150 fully equipped service vans, totally dedicated to providing Service24h roadside assistance. Work will be undertaken by accredited Mercedes-Benz technicians, who have the skills, knowledge and experience to keep your vehicles moving. Mercedes-Benz Truck warranties are generous too, with 12 months unlimited mileage on the complete vehicle. After this period, second and third year driveline warranties also apply.

For more information visit mbtrucks.co.uk/dealerlocator

Mercedes-Benz Service Contracts

Your truck is what drives your success. If it's moving, then so is your business. To give you additional peace of mind on the road, you can purchase a service contract from Mercedes-Benz when buying a new vehicle. The range of service contracts offer varying levels of cover and are tailored specifically to your needs as a business customer.

With a service contract, reliability and minimised downtime are ensured through regular vehicle maintenance. Our highly trained and experienced technicians only use approved repair methods, and the same high quality Mercedes-Benz GenuineParts your truck was built with.

As an added benefit, if you purchase a factory standard, on-road Euro VI vehicle on a Mercedes-Benz Complete Service Contract, then you will receive a free replacement vehicle in the event that your breakdown is not repaired within 24 hours. This is part of our commitment to Zero Tolerance on Downtime.

For more information visit mbtrucks.co.uk/servicecontracts

Finance

Choosing the right truck is important, so you would not want to compromise on how to finance it.

It's important to know that your finance comes from a specialist you can trust. That is why Mercedes-Benz Finance is our preferred financial partner as we believe they can give you in-depth knowledge, product support and assistance whenever you need it.

Key benefits

When you finance your Mercedes-Benz with us you are in safe hands:

- A consultative approach to advise you on the best finance option for your business requirements
- Loans are secured on the truck, not on other company assets
- If you are using any of our finance products to borrow more than £250,000, you can apply for an additional line of credit through Mercedes-Benz Finance

If you are unsure which Mercedes-Benz Finance product is best for you, why not try Finance Expert, the expert tool: mbtrucks.co.uk/financeexpert

Driver Training

With the right knowledge and skills of the driver, trucks operate more efficiently. Our Driver Training programme is proven to help you get more from your vehicle while staying safe and legal.

Benchmark, flexible, effective training techniques combine classroom theory and in-cab instruction, where delegates can put theory into practice to benefit their business.

Learning is tailored specifically to your vehicle and what you do with it, so even highly experienced drivers will benefit, especially when they're working with a new truck or a new application.

Key benefits

- Fully interactive learning experience, combining classroom and in-cab training
- Training for productivity, efficiency and safety
- All Mercedes-Benz Truck product courses are CPC accredited
- Reduction of running costs and improved profitability
- Full driving style analysis provided to educate and improve driving skills
- Specially adapted training vehicles from 7.5 tonnes upwards
- 30 years' experience of training drivers in the UK alone
