case of an impact and is suitable for children weighing up to 18 Kg.  
**Part no. 50900850**

### "Pin to Pin" alarm

The "Pin to Pin" alarm system has been specially designed by Fiat Lineaccessori to guarantee perfect compatibility with the body computer.

It also takes very little time to install: it makes use of the existing system outputs, thereby avoiding a long time spent routing the cables.

Functions: Battery Back-Up Siren, volumetric protection that can be excluded by remote control, perimeter protection, central locking. European homologation.

For vehicles with factory-fitted remote control (applicable to vehicles with chassis numbers starting from no. 12912).

**Part no. 46002793**

For vehicles without factory-fitted remote control

**Part no. 46002792**

### MetaSAT satellite anti-theft kit

The MetaSystems GPA800 is an interactive, self-management GSM and GPS location system. The system sends geographical co-ordinates via the GSM network to a designated mobile phone along with an explanation of the alarm trigger. The longitudinal/latitudinal co-ordinates can then be input into the MetaSAT website which show the location of the vehicle on street level maps.

The MetaSAT GPA800 can be programmed to warn about certain conditions, such as low battery voltage or if a pre-set speed limit is exceeded. By inputting a series of codes, the owner can obtain the status of the security system, the car's speed or location and effect remote immobilisation.

The car can also be 'blocked' remotely by a simple text message meaning the car cannot be driven if the car keys are stolen.

The level of self management, lack of contractual fees and versatility of the system make it an excellent choice for Fleet managers and private motorists.

### Key Features:

- No contractual service costs unlike competitive products\*
- Operates automatically and independently - Driver or Fleet manager is in control
- Thatcham Q Class Approval\*\*
- Covert communication with the driver
- Interaction with the engine via text message to immobilise or 'block' the vehicle
- Periodic status report

**Part no. 46002843**

\* A Sim card is required. Compatible with all Air time providers.

\*\* Q class number EVQ1090.

### Parking sensor

This is very useful for reversing manoeuvres.

It comprises two sensors that are installed in the rear bumper or in the number plate.

The increasing frequency of the acoustic signals indicates that the vehicle is getting close to an obstacle and these signals become constant when the limit is reached.

Rear bumper mounted sensors.

**Part no. 46002794**

Number plate support sensor kit, with installation times kept to a minimum.

**Part No. 46002795**

### \* Anti-theft bolts

For alloy wheels.

**Part No. 46002874**

### \* Aerosol fire extinguisher

**Part No. 71802129**

### \* Reflective jacket

**Part No. 71802288**

### \* Lockable fuel cap (for petrol versions)

**Part No. 71802520**

### \* Lockable fuel cap (for diesel versions)

**Part No. 71802900**

### \* Bulb kit

Supplied in a customized bag.

**Part No. 71802875**

### \* Warning triangle

**Part No. 71802632**

### Snow chains

**Part No. 71801704**

### Rear mudguards
