In 2017, Shelby American released the Lightning inspired Shelby F-150 Super Snake street truck. The renowned platform was one of the most successful in Shelby history. With Ford giving the F-150 a makeover 2021, making the truck the toughest, most productive F-150 ever. Shelby gave the Super Snake truck a completely new look inside and out, remade the suspension system, and added horsepower to the V8 muscle truck.

An optional 775 horsepower supercharger paired with Fords 5.0L Coyote V8 is at the heart of the Super Snake truck. Planting that horsepower to the pavement is an all new proprietary suspension system that lowers the truck, improves street performance, and helps plant the optional 775 horsepower to the pavement.

Inside, the truck has two-toned leather seat covers with Shelby emblems, the official Shelby serial number and Shelby floor mats. Each truck has deep tinted windows to keep the interior cool and a ram-air style hood.

A limited number of these trucks will be built for the US with additional going to select locations in Europe. For more information and to order a Shelby F-150 Super Snake, visit www.Shelby.com today.
