The Shelby Super Snake is back for 2023 with a fresh look and more refinement. Powered by an 825 horsepower supercharged Ford 5.0L V8, the Super Snake launches from 0-60 in 3.5 seconds. With new suspension and brakes, it carves up the road course with ease. And yet it is so tractable, able to roll down the street like a king on its Shelby 20 inch one-piece forged aluminum wheels and high performance tires. Wide Body and suspension options are also available for the ultimate in style and handling.

The extremely limited convertible Speedster Edition is back! Limited to 98 units per model year in the US, the Speedster Edition transforms the car into a two-seat roadster with a hard top tonneau system, accompanied by unique striping and badging, celebrating the 98th anniversary of founder Carroll Shelby's birth. A limited number will be built worldwide and each will be branded with a unique CSM number that will be included in the Official Shelby Registry.

**Starting From** USD\$140,270

*Pricing based on manual transmission, 401A, 202t Mustang GT, FOB Las Vegas, Nevada*
